1. Economically significant enterprises and geographic units belonging to these enterprises; economically significant enterprises are mostly those with GST turnover greater than \$30,000 per year.
2. Employee count is a headcount of all salary and wage earners for the February reference month. Counts of employees for each business have a small amount of 'noise' added or subtracted before they are combined into tables to protect individual businesses' data by at least 10%. For most cells, the individual businesses' noise tends to cancel out so the cell-level noise is relatively small. Where the cells correspond to just a few businesses, there will be relatively higher levels of noise to protect the corresponding businesses' data.
3. All numbers are provisional and subject to revision in the next release.
4. Due to rounding, enterprise, geographic unit, and employee count figures may not sum to the stated total(s).
