Kia ora,

**OIA 2024/18: Request for the latest *Adverse events following immunisation with COVID-19 vaccines: Safety Report***

We are in the process of updating the second edition of our [COVID-19 Nation Dates](#) book.

Our Table 4.2 (see below) looks at possible vaccine deaths and uses data from the Medsafe website. It is important that we have the most up to date information available before we publish in late August. We would like to ask the following two questions:

Q1: We note that the latest version of this report on the Medsafe website is the *Adverse events following immunisation with COVID-19 vaccines: Safety Report #46 – 30 November 2022* (see [here](#)). Can you provide the latest version of this report?

Q2: If this report has not been updated since 30 November 2022, can you please explain why? Those reading the book *COVID-19 Nation Dates* will want to have the latest information or at least know why this information is no longer available.

Many thanks,

Wendy

**Table 4.2: Possible vaccine deaths reported to CARM at 30 November 2022**

Adapted from [Medsafe, 2022a](#)

Age	Possible vaccine deaths reported to the Centre for Adverse Reactions Monitoring (CARM)
10–29 years	9
30–59 years	36
60–79 years	85
80+ years	54
