Preface

Every few years, the Institute produces a government department strategies (GDS) Index (e.g. the *2023 GDS Index*). This involves publishing a Handbook (which contains the data on each GDS), a Methodology (which explains the approach, issues and limitations) and a small number of additional working papers (depending on what areas the Institute has decided to focus on).

This Methodology explains how the *2023 Government Department Strategies Index Handbook – He Puna Rautaki* (the *Handbook*) was created. Its Māori name means the spring of profound strategic thinking.

The *Handbook* assesses whether sufficient information is available in government department strategies (GDSs) for readers to make a judgement on the quality of the strategies. It does not, itself, judge the quality of strategies.

The *Handbook's* purpose is twofold. First, it aims to help departments, and government more generally, develop an integrated and streamlined approach to strategy documents (e.g. removing repetition, confusing language and misalignment within and between departments), and ultimately increase the usability and transparency of these documents for the public.

Second, it is intended to make GDSs more accessible to the public, empowering citizens to work with government to achieve shared goals, improving public trust and enabling citizens to evaluate and critique strategies' effectiveness.

As a GDS is designed to manage significant issues of the day, a list of GDSs since 1994 provides a historical map of emerging or ongoing issues. This history is often lost due to the machinery of government. Once a GDS is no longer operational, it tends to be removed from the department's website, so lessons may not be learned and insights not gained.

To help build coordination across the public service and learn lessons from past strategies, we have previously suggested that the Public Service Commission (PSC) maintain a public register of all operational and non-operational GDSs as at the end of every calendar year, and require all operational GDSs to be listed in each department's annual report. This suggestion has not been implemented, but we continue to believe that making GDSs available on a register will be extremely helpful for politicians, public servants and the general public.

Given the recent establishment of the Ministry for Regulation Te Manatū Waeture, it may be more within the ministry's scope to establish and maintain a central register of GDSs, a consultation timeline for members of the public, and guidance on how government departments can improve GDS content.

We hope the Institute's own work contributes to improving strategic thinking across government and improving the public's interest in the work of public servants. As with any research, thanks must go to those who contributed. Thank you to government department officials for their assistance, patience and interest in our work and the team at the Institute for their hard work and persistence.

Wendy McGuinness
Chief Executive
McGuinness Institute

1.0 Introduction

This paper explains why the Institute produces and publishes a GDS Index and how the *2023 GDS Index* was created.

1.1 Purpose

Three objectives underpin the Institute’s research.

The purpose of the GDS Index is to:

1. maintain a public record of strategic documents published by government departments over time
2. provide feedback on strategic documents (ideally to help improve the quality of such documents going forward), and
3. showcase a process for improvement – for example, the GDS Index could be something that the public service actively manages, a public register of strategy documents that is easy for Ministers, officials and citizens to access and assess.

The key research question underlying the GDS Index is: Does this strategy document contain sufficient information for an independent reader to assess the quality of the strategy? Importantly, the *Handbook* does not itself review the quality.

Table 1.1 sets out the key publications that were published as a direct result of this methodology being implemented.

Table 1.1: The 2023 GDS Index publications

Publication	Type of publication	Title
<i>2023 GDS Index Handbook</i>	Book	<i>2023 Government Department Strategies Index Handbook – He Puna Rautaki</i>
Methodology	Working Paper	<i>Working Paper 2024/08 – Methodology for the 2023 Government Department Strategies Index as at 31 December 2023 (this document)</i>
Analysis of Climate Change	Working Paper	<i>Working Paper 2024/09 – Analysis of Climate Change in Government Department Strategies as at 31 December 2023</i>

1.2 What has changed since the 2021 GDS Index

The Institute has streamlined the *2023 GDS Index* in the following ways:

1. Improving clarity

The term ‘Scorecard’ has been changed to ‘Transparency Scorecard’ to be more precise.

2. Refining the criteria for GDSs

- Criterion 3 and criterion 4 of the Institute’s definition of what makes a document a GDS have been updated to reflect the tightening of the GDS criteria. Criterion 3 now states that documents must be externally facing, and criterion 4 now notes that a document must set out the approach (the means) and purpose of a strategy (the ends).
- All documents have been reviewed and those that were solely internally facing have been removed and archived. The focus has shifted to externally facing strategy documents. See Appendix 5 for a list of GDSs archived because they were solely internally facing.

- Web pages can now be included as GDSs. This is due to the increase in GDSs being published as web pages on departments' websites. (This also allows for Cabinet papers that have been published on departments' websites to be included.) The Institute is not comfortable with this emerging approach for these reasons: website content can be changed easily; there is less accountability and ownership (e.g. often they are not signed and/or the author is unclear); and less publication information (e.g. date, ISBN etc.) is given.

Note that we did not carry out an extensive search for GDSs of this nature as part of the *2023 GDS Index*; however, we have included GDSs published as web pages that we have been made aware of by government departments.

3. Streamlining time taken for scoring GDSs

The new additions to the *2023 GDS Index* have only been scored once, for 30 minutes, by one reviewer (rather than by two different reviewers). Introducing climate intelligence scoring to the *2023 GDS Index* meant we needed to allocate our second reviewer's time to that, rather than to checking the first reviewer's scoring. The next GDS Index is likely to be completed by one reviewer who will be given 30 minutes to score.

4. Merging of inter-related GDSs

In some cases, GDSs were merged with an overarching strategy document in order to achieve fairer representation of action and implementation plans and their inter-relatedness with overarching strategies. All documents that included the terms 'action', 'implementation', 'plan', 'policy', 'principles' and 'roadmap' have been reviewed under this process. See Appendix 6 for more detail on how the decision to merge documents was made.

5. Emphasising the length of time remaining for a GDS

Knowing the number of years remaining before a strategy expires is important for Ministers, officials and the public. For this reason, we have added a new 'year strategy ends' alert at the top of the index.

6. Assessing the scope

GDSs vary greatly in regard to how wide-ranging the subject matter they consider is; some GDSs relate to a broad range of demographics or species, and/or cover a generalised topic (e.g. seabirds, climate change), and others relate to a smaller group, and/or cover a specific topic (e.g. New Zealanders in aged care). In the *2023 GDS Index*, the Institute has decided to categorise GDSs as having either a 'wide' or 'narrow' scope (for definitions of these terms, see the Glossary).

Note that the Institute does not consider either a wide scope or narrow scope to be better. We have included this assessment as it is useful to understand the breadth of a GDS's subject matter, as those with a wide scope can be expected to be higher-level strategy documents, whereas those with a narrow scope tend to identify more specific details on how to implement the strategy.

7. Adding a climate intelligence score

As the Institute firmly believes departments should properly consider and integrate climate impacts into their strategies and strategic thinking, a climate intelligence score was added into the *2023 GDS Index* with the intention of foregrounding our climate analysis. See Section 3.2 for more detail on how GDSs were scored on their climate intelligence, and *Working Paper 2024/09 – Analysis of Climate Change in Government Department Strategies as at 31 December 2023* for a detailed analysis.

8. Removing radar diagrams

The radar diagrams have been removed from the Transparency Scoring process as they are time-consuming to create and we felt that the climate intelligence information was more important to include in the *2023 GDS Index*.

1.3 Background

Effective strategy helps government departments solve challenging problems, which is why GDSs are such important instruments for managing the long-term interests of New Zealanders. Despite this, no single government institution regularly reviews GDS content. There is no register to show which GDSs are operational, and no guidelines suggesting how a GDS should be written. GDSs are not required to be dated or signed, include information about their expected duration, or include when/if a review will be undertaken. There is no designated institution that the public can engage with to discuss the content of a GDS or complain about a department failing to engage with stakeholders. There is also no central register that collates all GDSs on a single platform, which would enable strategies to be viewed together, allowing interested parties to identify where repetition or synergies exist or strategic gaps lie. As a result, this important policy instrument has few feedback loops, little transparency and minimal accountability.

This is surprising for five reasons:

1. When analysing data on the creation of GDSs over the last 28 years, it is evident that GDSs are increasingly an important policy instrument to bring about change. Every year there are more: there were 230 operational GDSs as at 31 December 2023.
2. GDSs are expensive to generate, often requiring external expertise and public consultation.
3. GDSs often drive change over long periods. Sometimes they (and their visions) persist through successive governments.
4. GDSs are public documents. Not only do they provide a window into the workings of government, but they build on the thinking of the public through public engagement. The GDS drafting process is an opportunity to crowd-source ideas, generate consensus and collaborate with the wider community (including businesses, philanthropists and local authorities).
5. GDSs are critical instruments, able to bring about change. They track and describe the means to desired end/s. However, if there is no due diligence as to their content, structure and review, they may operate solely as blunt instruments – delivering more harm than good to the public by using valuable resources but failing to deliver any tangible outcomes.

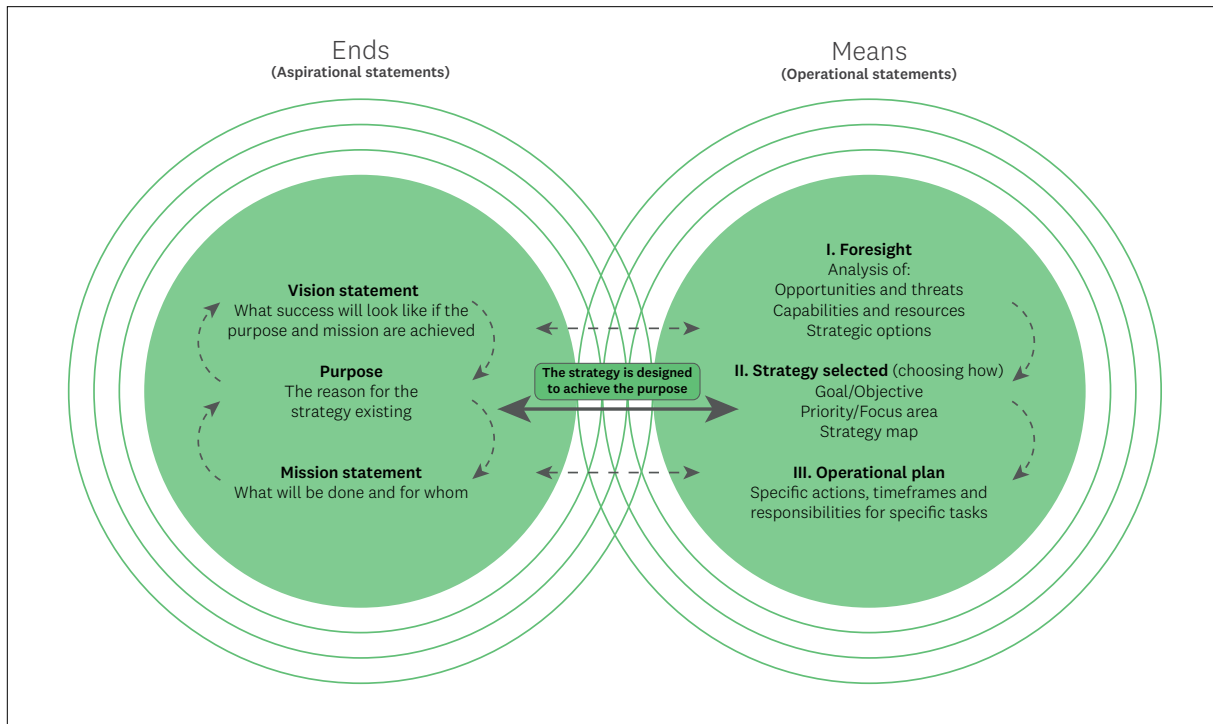

In school, children are taught that their goals need to be SMART (Specific, Measurable, Achievable, Relevant and Time-Bound) to be effective. This basic blueprint is missing in the majority of GDSs.

1.4 The important link between purpose and strategy

Figure 1.1 (overleaf) sets out how the Institute sees the link between an aspirational statement and an operational statement. The most important of these is the link between the purpose statement and the strategy statement. The connection between the two should be clear, logical and aligned. Within each GDS, departments should answer the ‘what question’ (what it wants) and the ‘how question’ (how it might be achieved).

A glossary of key terms is provided on pages 31–32.

Figure 1.1: Link between aspirational statements and operational statements

Aspirational statements

These statements are future-focused. Common aspirational statements are vision, values, purpose and mission statements. Although these terms have slightly different meanings, they are often used interchangeably.

Operational statements

These statements are action-orientated. Common operational statements include strategy, tactics, priority areas, focus areas, themes and plans. Although these terms have slightly different meanings, they are often used interchangeably.

Purpose statements

These are aspirational future-focused statements that explain in a concise, unique, coherent and specific way what the strategy aims to achieve and provide an impetus for action. A purpose statement is more specific than a vision or mission statement. A vision statement tends to be broad and general (e.g. to reduce poverty) and a mission statement tends to explain aspirations in terms of values and character (e.g. to be trustworthy and respected). In practice, vision, purpose and mission are often used interchangeably, but for the Institute, a purpose statement should be specific and able to be judged (i.e. was success achieved?). Examples might include to alleviate poverty for young mothers or to protect Hector’s dolphins. The purpose always sets the scope of a strategy. Although the purpose statement can include metrics, in practice, metrics are more commonly used to describe goals or objectives.

Strategy statements

Strategy statements are the ‘means’ to an end. The approach is unique to a department and indicates the method the department has chosen to adopt to bring about change. It describes the choices made.

1.5 The strategy pyramid

Figure 1.2 sets out how strategy can turn purpose into actionable steps. If each question in the strategy pyramid can be answered logically, it is possible to design a road map for achieving desired outcomes.

Using the metaphor of a road, the goal should be to find the fastest, safest and most cost-effective route from point A to point B. This is why it is so important for GDSs to be designed well, thoroughly tested and regularly re-evaluated; not just because of how much they cost, but because they have the potential to deliver significant long-term benefits to current and future generations. Put another way, a GDS only costs the public money when it is not effective. Hence, departments that design and stress-test strategies have a real responsibility to put effort not only into the initial strategy design, but the middle (the execution) and the end (the review, reflections and lessons). GDSs are a cheap and effective tool capable of delivering significant value to the public of New Zealand – officials have a responsibility to act in good faith and deliver on the public service principles.

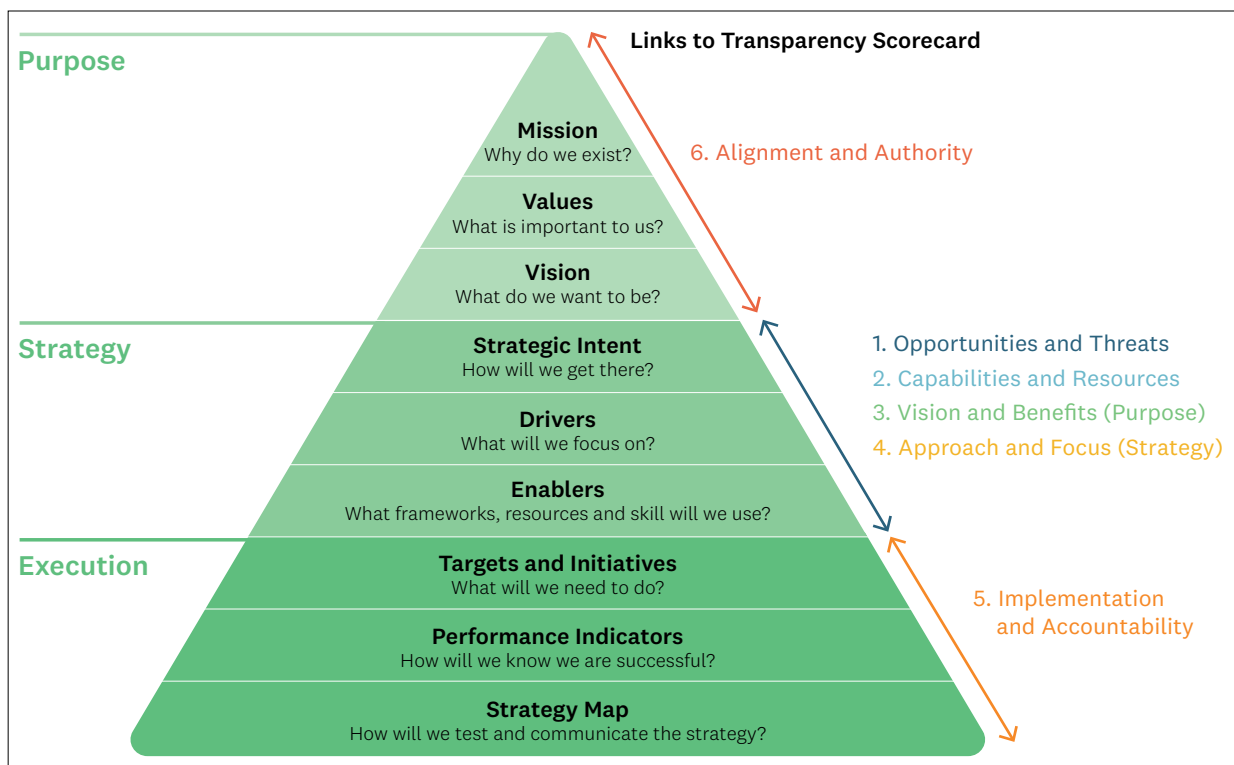

Section 12 of the Public Service Act 2020, sets out five public service principles, of which the fifth principle is stewardship. Furthermore, s 52 sets out the general responsibilities of chief executives of departments and departmental agencies, and states:

- (1) A chief executive of a department or departmental agency is responsible to the appropriate Minister for—
 - (a) improving ways of working across public service agencies; and
 - (b) their agency’s responsiveness on matters relating to the collective interests of government; and
 - (c) the operation of their agency, including in carrying out the purpose of the public service under section 11; and
 - (d) supporting that Minister to act as a **good steward of the public interest**, including by—
 - (i) maintaining public institutions, assets, and liabilities; and
 - (iii) providing advice on the long-term implications of policies; and...
 - (h) the efficient and economical delivery of the goods or services provided by the agency and how effectively those goods or services contribute to the intended outcomes. See more detail in Appendix 1.

Figure 1.2 shows how the strategy pyramid connects to the Institute’s Transparency Scorecard.

Figure 1.2: The link between the strategy pyramid and the Institute’s Transparency Scorecard

Source: Adapted from McGuinness Institute Project 2058 report – Science Embraced: Government-funded Science under the Microscope (2012)¹

2.0 Methodology

2.1 Previous GDS Index data sets

Given the McGuinness Institute’s focus on New Zealand’s long-term future,² government department strategies help to shape our thinking and influence several of our projects. The GDS Index, as part of *Project StrategyNZ*, provides a foundation for future Institute research into external reporting strategy, specifically climate change reporting and climate change strategy (encompassed by the projects *ReportingNZ* and *ClimateChangeNZ*).

The Institute has a number of initiatives focused on strategy. We support consideration of the development of a nationally integrated strategy for New Zealand which would anchor and align all government department strategies.

We have collected GDS data six times (in 2014, 2015, 2018, 2020, 2021 and 2023). Table 2.1 below provides a comprehensive list of all GDS data sets generated to date.

Table 2.1: GDS Index data sets over time

GDS data set	GDSs in operation	GDSs archived	Total GDSs since 1 July 1994	GDSs in operation as a percentage of all GDSs since 1 July 1994
GDSs as at 30 June 2014	136	154	290	46.9%
GDSs as at 30 June 2015	134	168	302	44.4%
GDSs as at 31 December 2018	148	265	413	35.8%
GDSs as at 31 December 2020	199	288	487	40.9%
GDSs as at 31 December 2021	221	327	548	40.3%
GDSs as at 31 December 2023	230	406	636	36.2%

Note to Table 2.1

This includes GDSs that have been jointly held. Each time a jointly held document is listed against a department, it is treated as one GDS. Hence, a strategy jointly held by four departments is included four times in the GDS Index. See Appendix 7 for a list of all jointly held GDSs.

Over time, the methodology of the GDS Index has been further developed and refined. This is the fourth time the methodology has been refreshed. A complete list of GDS publications can be found in Appendix 1.

Table 2.2, opposite, sets out the process applied to generate the GDS Index.

In the *2023 GDS Index*, of the 79 GDSs archived (being 406 - 327, see Appendix 9):

- 69 from the *2021 GDS Index* were archived as ‘no longer in operation’
- 4 were added to the *2023 GDS Index* and then archived from the *2023 GDS Index* as ‘no longer in operation’. Ideally, the department should have advised the Institute of these potential strategies as part of the OIA process for the *2021 GDS Index*.
- 4 were archived from the *2021 GDS Index* as found to be ‘solely internally facing’
- 1 was archived from the *2021 GDS Index* as ‘no longer meets the criteria’
- 1 was archived from the *2021 GDS Index* as ‘no longer jointly held’.

Table 2.2: The 2023 GDS Index process

	GDSs from the 2021 GDS Index		2023 GDS Index	
Stage 1 Collection	List of previous GDSs (See Working Paper 2022/02: Complete Lists of Government Department Strategies Between 1 July 1994 and 31 December 2021)	221	List of potential new GDSs OIA requests are made to each government department between January 2024 and November 2024, requesting all GDSs they hold (see Worksheet 1).*	138
Stage 2 Verification	Less rejected strategy documents		Less rejected strategy documents	
	Less 2021 GDSs archived by department as 'no longer in operation' (see Appendix 9)	-69	Verification 1: Initial review Less documents that clearly 'did not meet the criteria' (see Appendix 4)	-7
	Less 2021 GDSs archived by Institute as found to be 'solely internally facing' (see Appendix 5)	-4	Verification 2: Detailed review (a) Less documents that on a closer look 'did not meet the criteria' (see Appendix 4)	-18
	Less 2021 GDSs archived by Institute as found to 'no longer meet the criteria' required to be considered a GDS (see Appendix 9)	-1	(b) Less documents found to have been in the 2021 GDS Index under a different title (see Appendix 4)	-3
	Less 2021 GDSs archived by department as 'no longer jointly held' (see Appendix 9)	-1	Less documents added to the 2023 GDS Index and archived as 'no longer in operation'. (see Appendix 9)	-4
	Less merged strategy documents		Less merged strategy documents	
	Less 2021 GDSs merged by Institute with previous GDSs (see Appendix 6)	-3	Less strategy documents merged by the Institute (see Appendix 6)	-19
Stage 3 Total	New additions to the 2023 GDS Index			87
	2021 GDSs to be carried forward	143		143
	Total GDSs in operation as at 31 December 2023 (See Appendix 10)			230

*Note: An OIA schedule combines all correspondence with government departments. It is published on the McGuinness Institute's 'OIAs and other correspondence' web page.³

2.2 Does the document meet the Institute’s definition of a GDS?

For the purposes of the *2023 GDS Index*, ‘government department strategy’ (GDS) is defined in terms of the following criteria.

A ‘government department strategy’ must:

1. be a publicly available document that is published by a government department
2. be a public-facing document that is written for the public to read
3. be an externally facing document (i.e. not written for internal management purposes)
4. be a strategic document that contains long-term thinking (i.e. it sets out the approach (the means) and the purpose (the ends) of the strategy)
5. be a national document (i.e. it excludes local and regional strategies)
6. be a document that looks out at least two years or more, and
7. not be a corporate document (i.e. not a statement of intent, a four-year plan or an annual report).

A document will be excluded if it does not meet the definition of a GDS above. We contact the relevant department and explain why it does not meet the definition. Question 1 below explains the process for excluding a document from the GDS Index and gives some examples. See Appendix 4 for the full list of GDSs rejected from the *2023 GDS Index*. Please note, when discussing a specific GDS in the *2023 GDS Index*, the Institute’s protocol is to include the GDS number in square brackets. As noted, titles are not always consistently used by departments so this protocol ensures there is no doubt as to what GDS the Institute is referring to.

Technical questions with practical examples

1. How does the Institute deal with strategies that do not meet the definition of a GDS?

Before accepting a document as a new operational GDS, we check its publication and operational dates to ensure they align with the year for which the analysis is carried out. For example, a new GDS published in January 2024 will be excluded from the *2023 GDS Index* as it is past the cut-off date for this particular GDS Index update.

When assessing GDSs, the Institute came across some documents that appeared to be GDSs but did not meet the criteria. An example is Land Information New Zealand’s (LINZ’s) *Biosecurity and biodiversity strategy*. This document did not meet criterion 1 of the definition as it is not ‘a publicly available document’. It was evident that this strategy was only available by request, therefore was not designed by the department to be public-facing.

If it is unclear whether a document is a GDS (as defined by the Institute), it is placed in a separate folder for further review. If a document is deemed not to be a GDS, an explanation is provided to the respective government department via email and is included on the Institute’s [OIA correspondence schedule](#).

Documents that are required to be produced every year are also not included in the McGuinness Institutes’s GDS definition. Examples include national policy statements, statements of intent (SOIs), performance improvement framework reviews (PIFs), briefings to the incoming Minister (BIMs) and long-term insights briefings (LTIBs). ‘Regulatory stewardship documents’ also fall into this category with three exceptions: DIA’s [GDS04–08] *Regulatory Services Group Strategy*; LINZ’s [GDS09–03] *Regulatory Stewardship Strategy*; and MBIE’s [GDS15–14] *Regulatory Systems Stewardship Strategy* (see reason on p. 18).⁴

In the *2023 GDS Index*, a slight exception to criterion 1 was made. [GDS03–04], [GDS17–09], [GDS19–34], [GDS21–01], [GDS22–02], [GDS23–13], [GDS27–02] and [GDS28–02] *Te Aorerekura – The Enduring Spirit of Affection: The national strategy to eliminate family violence and sexual violence* (December 2021), jointly held by several departments, was identified as a GDS even though it was produced by Te Puna Aonui, an Interdepartmental Executive Board (IEB).

We consider this to be a GDS as the departments are members of the IEB and thus share a responsibility for not only the implementation of the strategy, but the strategy itself.

2. How are strategy documents that are related treated?

Some government departments have GDS packages that comprise multiple interconnected documents, such as a broader strategy document and related action or implementation plans. Where the documents are so intertwined it would be inappropriate to treat them as separate, these have been combined and considered as one strategy, where practicable, to avoid giving undue weight to the package or making unfair assumptions if departments separate their GDS across several documents.

In the *2023 GDS Index*, there were 12 documents that consisted of more than one document (see list in Appendix 6). For example, [GDS11-04] and [GDS20-06] *Fale mo Aiga – Pacific Housing Strategy 2030* (November 2022) and *Fale mo Aiga – Pacific Housing Action Plan 2030* (November 2022) were treated and scored as one strategy, as the Ministry for Pacific Peoples (MPP) intended the two documents to be read together. In contrast, the Ministry of Health’s (MOH’s) [GDS19-08] *He Korowai Oranga – Māori Health Strategy* (June 2014) and [GDS19-27] *Whakamaua – Māori Health Action Plan 2020–2025* (July 2020) have not been merged and instead are treated as separate strategies. This is due to the length of time between the publication of the two strategies and the content of [GDS19-27] *Whakamaua – Māori Health Action Plan 2020–2025* (July 2020) being detailed enough to warrant standing on its own.

Action and implementation plans can still be considered GDSs if they meet the Institute’s GDS criteria: in particular, if they contain long-term thinking and set out the means (the strategy) and the ends (the purpose). See the example from the Ministry of Health directly above for an action plan that has been considered a stand-alone GDS.

When merging interconnected GDS documents:

- Each must individually meet the GDS criteria as a stand-alone document.
- The documents must clearly be related to the same strategy, i.e. they were released under the same project name and the supporting document references the main strategy document.

From a public good perspective, as much information as possible on actions and implementation is good practice, as it enables the public to understand, review and assess the department’s intentions and later its success. It also ensures there is an opportunity for future policy analysts, politicians and interested parties to understand how theory translated into practice and to learn the lessons of what worked and what did not.

3. How is a jointly held GDS treated?

In the *2023 GDS Index*, 37 of the 230 GDSs in operation are jointly held by two or more government departments (see list in Appendix 7). The term ‘jointly held’ is defined in the glossary. As in the previous *2021 GDS Index*, we have treated jointly held GDSs as being held by each department separately (i.e. a GDS owned by three departments is treated as three GDSs). Although this means more weight is put on jointly held GDSs, it allows for more accurate GDS comparison across departments and sectors.

4. What happens when a department is disestablished?

The Institute notes that the department was disestablished and checks to ensure that none of its GDSs have been passed on to another department. An example of this is the Canterbury Earthquake Restoration Authority (CERA).⁵ CERA was disestablished on 18 April 2016, and therefore is excluded from our analysis. When this agency was disestablished its GDSs were not transferred to any other agency.

5. What happens when a new department is established between GDS Index updates?

The Institute adds this department into the analysis. For example, Te Kāhui Whakamana Rua Tekau mā Iwa—Pike River Recovery Agency was established by the State Sector Order 2017 (Te Kāhui Whakamana Rua Tekau mā Iwa—Pike River Recovery Agency) on 11 December 2017, and therefore

qualified for the *2018 GDS Index* and *2021 GDS Index*. The Ministry for Regulation, established on 1 March 2024 by the Public Service (Ministry for Regulation) Order 2024 (SL 2024/5), and the Social Investment Agency, established on 1 July 2024 by the Public Service (Social Investment Agency) Order 2024 (SL 2024/73), were excluded from the *2023 GDS Index* as these departments were established after the cut-off date for this particular index.

6. What happens if there is more than one GDS in a document?

If a government department publishes two GDSs in one document but indicates in their OIA response that these are two distinct GDSs, they are treated as two separate GDSs. These GDSs may have been combined in one document because they were part of the same work programme, or for another reason unknown to the Institute. For example, in 2014, the Ministry of Business, Innovation and Employment (MBIE) specified two separate GDS documents in their response table, but the two documents were attached in a single PDF. These documents were *Energy Strategy* (August 2011) and *Energy Efficiency and Conservation Strategy 2011–2016* (2011), and as stated, were analysed as two separate GDSs. Both GDSs were archived in the *2023 GDS Index*.

7. How is this information ordered?

Excel spreadsheets and hard copy folders of departments are ordered alphabetically, consistent with the order of departments in Schedule 2, Part 1 of the Public Service Act 2020 (see Appendix 3).

Each time the GDS Index is updated, an updated version of Schedule 2, Part 1 of the Public Service Act 2020 is used. This is the record of which government departments exist.

8. Which government departments are included?

This is one of the first steps that needs to be taken before sending out Official Information Act requests, as this determines the full list of departments to be contacted. To determine this list, the Institute did the following:

- (i) Visited legislation.govt.nz.
- (ii) Searched for the Public Service Act 2020.
- (iii) Clicked on the ‘versions and amendments’ tab on the upper right-hand side.
- (iv) Ensured the version that they were viewing (as indicated with brackets) was the appropriate one for the time period of the GDS Index update.
- (v) Downloaded the PDF of this version.
- (vi) Printed Schedule 2 and used this as the copy for determining the list of existing government departments.
- (vii) Alternatively, if a historic version of the legislation was sought, found the appropriate version and downloaded the PDF of this version.

9. How does the Institute check whether a GDS has been updated or replaced?

If the original strategy and the updates are not substantially different and follow a similar approach, the update is not treated as a new GDS. For the purposes of the GDS Index, the original publication date is treated as the publication date in all cases. In cases where a strategy is significantly different from its predecessor, this is often indicated by a change in year (e.g. the Government Communications Security Bureau (GCSB) and New Zealand Security Intelligence Service’s (NZSIS’s) *Diversity and Inclusion Strategy 2017–2020* was archived and replaced by the *Diversity & Inclusion Strategy 2021–2025* [which has since been archived, due to being solely internally-facing, see Appendix 5]). On the other hand, the Department of the Prime Minister and Cabinet’s (DPMC’s) [GDS05–05] *Countering Terrorism and Violent Extremism Strategy* was first published in February 2020 and was then updated in June 2021 and October 2022, hence the update published in October 2022 is the current GDS in operation.

10. What happens if a GDS has been archived by a department before a replacement strategy is made public?

If a new strategy replaces an archived strategy, there may be a time gap between the original strategy being archived and its replacement being published. In all cases we follow the directive of the OIA response from the department as to whether the GDS is operational for the purposes of the GDS Index. For example, LINZ advised in November 2018 that their GDS *Understanding Our Geographic Information Landscape: A New Zealand Geospatial Strategy: A Coordinated Approach to Location Information* (published in January 2007 and listed in the 2015 GDS Index) was no longer current. They also advised that it had been taken down from the LINZ website (with work under way on a replacement). It was therefore not listed in the 2018 GDS Index.

11. If a GDS is published as a web page (not in a PDF format) and is not dated, does it meet the Institute's GDSs definition?

Yes, while ideally a GDS should be a position 'statement' or a 'report' at a fixed point of time, GDSs published as web pages have been included in the 2023 GDS Index and will be in future Indexes. As stated in Section 1.2, this is due to the increase in GDSs being published as web pages on departments' websites. (This also allows for Cabinet papers that have been published on departments' websites to be included.) GDSs published as web pages were previously not included in the 2018 GDS Index and the 2021 GDS Index for the following reasons: website content can be changed easily; there is less accountability and ownership (e.g. often they are not signed and/or the author is unclear); and less publication information (e.g. date, ISBN etc.) is given.

12. How does the Institute determine if a GDS is internally or externally facing?

A strategy is considered internally facing if it is focused on the operations of the department that are specific to the department's staff or resources. An externally facing strategy is considered to be focused on subject matter outside of the department.

For example, the GCSB and NZSIS's *Diversity and Inclusion Strategy 2021–2025* (July 2021) is focused on creating a diverse and inclusive workforce and therefore is considered internally facing. As a result, it has been removed from the 2023 GDS Index. In contrast, MOH's [GDS19–31] *Data and Information Strategy for Health and Disability – He Rautaki Raraunga, He Rautaki Pārongo mō te Pūnaha Hauora, Whaikaha hoki* (November 2021) is externally facing as it considers how data and information is collected and managed in order to create better outcomes for the health and disability sector.

13. When are strategy documents not considered to be a GDS, and therefore excluded from the GDS Index?

The Institute acknowledges GDSs are not the only instruments used by government to bring about change. Examples include:

- Government work programmes: A few departments set out a programme of action. In some instances, programmes of action do not meet the fourth and sixth criteria as they do not contain long-term thinking or look out at least two years or more. For example, the *Carbon Neutral Government Programme* was established to 'show leadership to reduce the Government's own emissions and demonstrate what is possible to other sectors of the economy'.⁶ Documents published under the Carbon Neutral Government Programme typically function as guidelines, not strategic documents that set out the means and the ends. For this reason they do not meet criterion 4, and although sometimes they do contain the overall objectives of the Carbon Neutral Government Programme, they do not contain steps to get there.
- Government priorities: A general discussion on government priorities can be found in the Speech from the Throne (every three years), the Budget Policy Statement (usually in November or December) and the Budget Speech (usually in May or June). These do not meet criterion 1 as they are not produced by a government department.

- Cabinet strategy documents: Cabinet can issue strategy documents independent of departments, often proactively released Cabinet minutes. However, these do meet criterion 1, provided they are later published by a government department, for example, [GDS13–10] *Nationally Determined Contribution Strategy* (October 2023).
- Political manifestos: A few instruments guide goals and decision-making from outside of government, for example election manifestos. These do not meet criterion 1 as they are not produced by a government department.

To illustrate how GDSs have been selected, practical examples are explained in detail below:

Example 1: When are similar types of documents treated differently?

There are a number of regulatory stewardship plans that are published by Government. In the 2021 *GDS Index*, the Department of Internal Affairs' (DIA's) [GDS04–08] *Regulatory Services Group Strategy* (July 2021) was added while the Ministry of Transport's (MOT's) *Transport System Regulatory Stewardship Plan 2019-2022* (2019) was excluded. The earlier document was included because of its strategic content and long-term thinking, whereas the latter was excluded because it contained very little strategic content and was more operational in nature.⁷

Example 2: When is a document a new GDS or just a minor change to an existing GDS?

In the 2014 *GDS Index*, the Ministry for the Environment's (MFE's) strategy *New Zealand's National Implementation Plan under the Stockholm Convention on Persistent Organic Pollutants* (2006) was added. In 2018, MFE published *New Zealand's updated national implementation Plan under the Stockholm Convention on Persistent Organic Pollutants* (2018). The latter was treated as a minor change to an existing strategy. This is because the Institute was informed by MFE that the document was intended to be read alongside, and to support, the existing GDS. However, MFE advised that [GDS13–08] *New Zealand's Updated National Implementation Plan under the Stockholm Convention on Persistent Organic Pollutants 2022* (December 2022) should be added to the 2023 *GDS Index* as a standalone strategy.

The Ministry for Primary Industries' (MPI's) *Biosecurity 2025 Implementation Plan* (2018) was excluded from the 2021 *GDS Index* because it supports an existing GDS, [GDS12–08] *Biosecurity 2025 Direction Statement* (November 2016). This will no doubt be reviewed by MPI when the next index is undertaken.

Example 3: What if the duration of a strategy is exactly two years?

MFE's *Sustainability Strategy* (2020) has a duration of exactly two years (July 2020 to June 2022) and was therefore included in the 2021 *GDS Index*.

Example 4: What if one document contains two strategies?

MBIE's *Developing our Energy Potential* (2011) was included in the 2014 *GDS Index*. This document contained both the *Energy Strategy 2011–2021* (2011) and the *New Zealand Energy Efficiency and Conservation Strategy 2011–2016* (2011). For the 2021 *GDS Index*, the earlier strategy was operational, whereas the latter was archived. MBIE indicated that the two strategies should be treated as separate GDSs, hence only the *Energy Strategy 2011–2021* (2011) was included in the 2021 *GDS Index*. The *Energy Strategy 2011–2021* (2011) has since been archived in the 2023 *GDS Index*.

Example 5: What if two documents are published that together make up one strategy?

Some government departments have GDS packages that comprise multiple interconnected documents, such as a broader strategy document and related action or implementation plans. Where the documents are so intertwined it would be inappropriate to treat them as separate, these have been combined and considered as one strategy where practicable to avoid giving undue weight to the package or making unfair implications if departments separate their GDS across several documents (see example in Question 2 on p. 15).

When merging interconnected GDS documents:

- Each must individually meet the GDS criteria as a stand-alone document.
- The documents must clearly be related to the same strategy, i.e. be released under the same project name with the supporting document referencing the main strategy document.

Example 6: What happens if a jointly held document is no longer held by one of the departments?

It is archived. For example, the *Tertiary Education Strategy 2014* was jointly held by MBIE and MOE in the *2018 GDS Index*, but then became solely held by MOE in the *2020 GDS Index*. In this case, MBIE's GDS was archived in the *2020 GDS Index* (see Appendix 9, row 219).

Example 7: When is a regional strategy considered a strategy of national significance?

The Department of Conservation's (DOC's) [GDS02-02] *Subantarctic Islands Research Strategy* (May 2005) was included in the *2014 GDS Index*. Despite only being a regional strategy (criterion 5), the GDS has national significance as it is designed to guide 'researchers to indicate the types of research that DOC currently considers will be useful for wise and effective management of this internationally significant group of islands' (p. 12 of the GDS).

Example 8: What if a GDS remains on a department's website as operational after the Institute has been advised it should be archived?

The Ministry of Foreign Affairs and Trade's (MFAT's) *Opening Doors to China: New Zealand's 2015 vision*, *ASEAN Partnership: One pathway to ten nations* and *Advancing with Australia: New Zealand Inc Australia strategy* were initially treated as archived. However, when preparing the *2021 GDS Index*, researchers noticed that these strategies were still available from MFAT's website. Given our definition, they were treated as operational for the *2021 GDS Index*. This was a difficult situation but we believe that as an independent person would have considered these active, the Institute should also treat them as active. As there was no record of them on the MFAT website in 2023, they were removed from the *2023 GDS Index*.

2.3 Worksheets

The following worksheets describe how the GDS Index is created. Briefly, the Institute creates (with the help of government department officials) a list of all GDSs (as at the specified date). Of these, only the operational GDSs are scored against the Transparency Scorecard. For transparency, we have included a set of worksheets that our staff use to carry out this work. The worksheets are written in such a way that the process can be repeated by future McGuinness Institute staff.

- Worksheet 1: How to create the OIA Excel
- Worksheet 2: How to create the Master Excel
- Worksheet 3: How to create the Transparency Scorecard Excel
- Worksheet 4: How to determine which sector a department belongs to
- Worksheet 5: How to search statements of intent and annual reports
- Worksheet 6: How to create the legislation folder
- Worksheet 7: How to search within GDSs for mention of the term 'Act'
- Worksheet 8: How to update the operational GDS table on the McGuinness Institute website

2.4 Review of processes (scoring of sub-elements)

Every time the Institute undertakes the scoring process, we review it in order to improve our processes. The only significant change in process between the *2021 GDS Index* and the *2023 GDS Index* was using one reviewer rather than two (see Section 3.3).

2.5 Assumptions and limitations

The GDS analysis has three general limitations:

1. The Transparency Scorecard is designed to examine the content of the strategy document. Therefore, no judgement is made in regard to the quality of the problem definition (i.e. whether the strategy is appropriate given the current policy landscape), the cleverness of the strategic approach or how the strategy is envisaged to be implemented.
2. The Transparency Scorecard does not review whether the strategy has been implemented and what outcomes actually resulted from its implementation. Although an important exercise, this question is beyond the scope of the analysis, as the resources required to carry this out would be beyond those of the Institute.
3. The Institute is highly reliant on the accuracy of the government departments' OIA responses.

Specific limitations of the analysis include:

- The GDS Index relies on the OIA responses from each department being consistent and accurate. Although the Institute has attempted to correct clear inconsistencies and gaps where possible (e.g. confirming jointly held GDSs were co-owned by each of the listed departments), we have not sought to further verify the responses beyond this.
- Four GDSs were added to the list after the *2021 GDS Index* and deleted before the *2023 GDS Index* as departments indicated that the GDS was no longer operational (i.e. in between GDS Index updates). To keep track of these GDSs, a comprehensive list is provided in Appendix 9.
- The Transparency Scorecard did not analyse the drafting history of the GDS and whether this included consultation and engagement with the public. It did not look at the extent to which the public collaborated in its vision or outcomes.
- A level of judgement was necessary when carrying out the analysis of GDSs against the Transparency Scorecard. Similarly, setting the elements themselves and the values attributed to each sub-element was a wholly subjective exercise based on the Institute's position on what makes a strategy 'good'. Therefore, others who undertake a similar analysis may reach different results due to using a different metric or differences in the values awarded to each sub-element.
- The reviewers' judgements as to the accessibility of the GDS to public servants and the public (featured in the three qualitative questions at the bottom of each scoring form) may not be agreed upon by all. These judgements reflect the opinion of the Institute's reviewers, and as such they are subjective. The reviewers strove, however, to take a moderate, neutral and representative approach in their answers.
- Where departments did not have publicly available strategic documents (the statement of intent or annual report), the analysis under element 6 (Alignment and Authority) was limited, as the reviewers could not assess the integration of the GDS with the missing strategic document. In this case, the missing sub-element was given a score of 0. This occurred twice in both the *2021 GDS Index* and *2023 GDS Index*.
- We have, as a policy, not removed older GDSs from any GDS Index on the grounds that they no longer meet the criteria today. For example, MOH's [GDS19-07] *Care Closer to Home* (February 2014) was included in the *2014 GDS Index*; however, if it was reviewed for inclusion for the *2021*

GDS Index it would have been excluded on the basis it does not contain adequate strategic thinking (criterion 4). It was included in the *2014 GDS Index* because of the following statement: ‘This booklet highlights some of the many initiatives that our health professionals are undertaking with the aim of providing better, integrated health care closer to home for all New Zealanders’ (p. 5 of the GDS).

As our intention is to provide comprehensive analysis of GDSs published over the last 30 years, the Institute welcomes feedback on this working paper and the *2023 GDS Index*.

3.0 Scoring

3.1 Nature of subject matter (narrow or wide scope)

Each GDS has been grouped into one of two categories to reflect the extent to which its subject matter is narrow or wide in scope. Generally GDSs with a wide scope tend to be more strategic and high-level than narrow scope strategies. For example, a wide scope might include a discussion on a range of demographics or species, and/or cover a generalised topic (e.g. seabirds, climate change). In contrast, a narrow scope might be very specific (e.g. the hoiho penguin or syphilis). Furthermore, a GDS with a focus on the wellbeing of all New Zealanders (which would be considered to have a wide scope) may lead to the development of a more specific strategy, such as one that focuses on the wellbeing of New Zealanders in aged care (considered a narrow scope).

The purpose of this information is so the reader can quickly appreciate the scope of the strategy, and the Institute can draw a distinction between the types of strategies the government has in operation. See the *2023 GDS Index Handbook* for the results.

3.2 Climate (climate intelligence)

Part A – Extent of response

Each GDS has been grouped into one of four categories to reflect the extent to which it discusses climate change impacts and delivering better climate outcomes. See flow chart in Figure 2.1 (overleaf).

Stage 1: Does the GDS contain specified terms?

Each active GDS was searched for: ‘climate’; ‘carbon’; ‘emit’; ‘emissions’; ‘nationally’; and ‘NDC’. The previous paper, *Working Paper 2022/07 – Analysis of Climate Change in Government Department Strategies as at 31 December 2021*, only searched ‘climate’, but this was broadened to include other climate-related terms. GDSs that did not contain these terms were labelled ‘No mention’.

Stage 2: If yes, do the specified terms relate to climate change?

Remaining GDSs were reviewed to check if the terms related to climate change or another context (e.g. economic ‘climate’). If they did not relate to climate change, the GDS was labelled ‘No mention’.

Stage 3: If yes, does it discuss climate change impacts and how to deliver better climate outcomes?

Remaining GDSs were reviewed to check if they discussed climate change impacts and how they hope to deliver better climate outcomes. GDSs that did not consider this were labelled ‘Mention only’.

Stage 4: If yes, is it detailed, specific and measurable?

The remaining GDSs were then reviewed to determine whether the strategy contained a detailed discussion of climate change impacts and how it would deliver better climate outcomes. GDSs that did (e.g. a strategy with several specific and measurable next steps) were labelled ‘Detailed response’ and those that did not (e.g. a strategy that plans to do more research or planning with no real detail) were labelled ‘Basic response’.

Note: ‘Mention only’, ‘Basic response’ and ‘Detailed response’ replace the ‘Implicit’ and ‘Explicit’ categories found in *Working Paper 2022/07 – Analysis of Climate Change in Government Department Strategies as at 31 December 2021*. This change has been made to better distinguish the wide variety of GDSs that previously fell within the ‘Implicit’ category and focuses the analysis on how departments are responding.

Part B – Focus of response

Stage 1: What is the focus of the response?

Working Paper 2022/07 – Analysis of Climate Change in Government Department Strategies as at 31 December 2021 distinguished individual action points from each GDS. Given the ambiguous and subjective nature of that process, we have instead decided to determine the focus of each response.

Because some level of climate change is unavoidable, a response's focus can be on:

1. **Adaptation:** adjusting to the actual or expected future climate (e.g. preparing for negative impacts, like sea level rise and extreme weather events, or taking advantage of opportunities, like longer growing seasons in some areas); and/or
2. **Mitigation:** reducing the greenhouse gases flowing into the atmosphere (e.g. reducing greenhouse gas sources, like burning fossil fuels, or enhancing the 'sinks' that accumulate and store these, like the oceans, forests and soil).

Categorising departments' responses as 'adaptation', 'mitigation' or 'adaptation and mitigation' has allowed us to make meaningful comparisons between responses and will allow us to analyse future trends in this area.

The 59 GDSs that set out the departments' responses (i.e. labelled 'Basic response' or 'Detailed response' in Part A) were then assigned to one of the following categories based on their focus:

- **Adaptation:** responding to the effects of climate change (e.g. moving from impacted areas).
- **Mitigation:** responding to the cause of climate change (e.g. reducing emissions).
- **Adaptation and mitigation:** responding to both the cause and the effects of climate change.

Figure 3.1: Climate intelligence flow chart

3.3 Designing and applying the Transparency Scorecard

The Transparency Scorecard was devised to assess each GDS document. This is largely a product of a discussion held on GDSs on 1 October 2014. These ideas were further explored in December 2014. We would like to thank the following people for their additional insights which helped the Institute develop the elements, structure and questions contained in the Transparency Scorecard: Professor Stephen Cummings, Director of The Atom Innovation Space, Victoria University; Patrick Nolan, Productivity Commission; James Palmer, Deputy Secretary Strategy, Ministry for the Environment; Rodney Scott, State Services Commission and Treasury; and Simon Wakeman, Productivity Commission.

Strategy Builder: How to create and communicate more effective strategies (2015), by Stephen Cummings and Duncan Angwin, proved extremely useful when assessing the elements to be used and developing the sub-elements.⁸

Description of the elements:

The order of elements in the Transparency Scorecard does not reflect the final order in the published GDS; it represents the order in which we formulate the GDS (see Figure 3.2 and 3.3 below).

Figure 3.2: The six elements

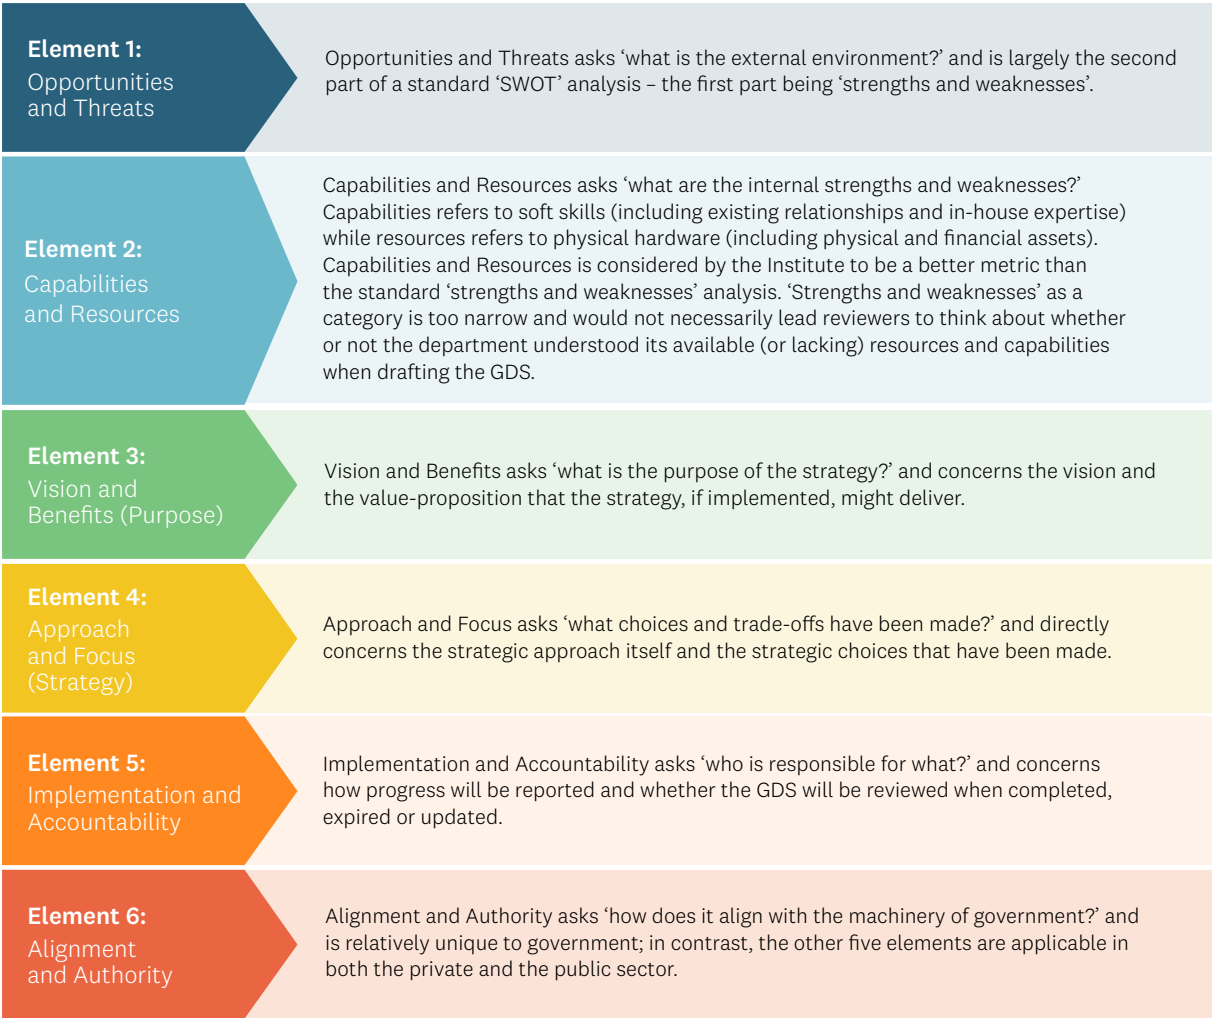

Figure 3.3: The six elements and 21 sub-elements in the Transparency Scorecard

To score the GDS, points are allocated to each sub-element on the Transparency Scorecard. In the 2023 GDS Index there are 21 sub-elements. Seventeen sub-elements were allocated four possible points, two sub-elements were allocated six possible points (6.2 and 6.3), and two sub-elements (1.3 and 3.3) were allocated a possible eight points. This weighting is based on the importance of the sub-element. The highest possible total score in the Transparency Scorecard is 96 points.

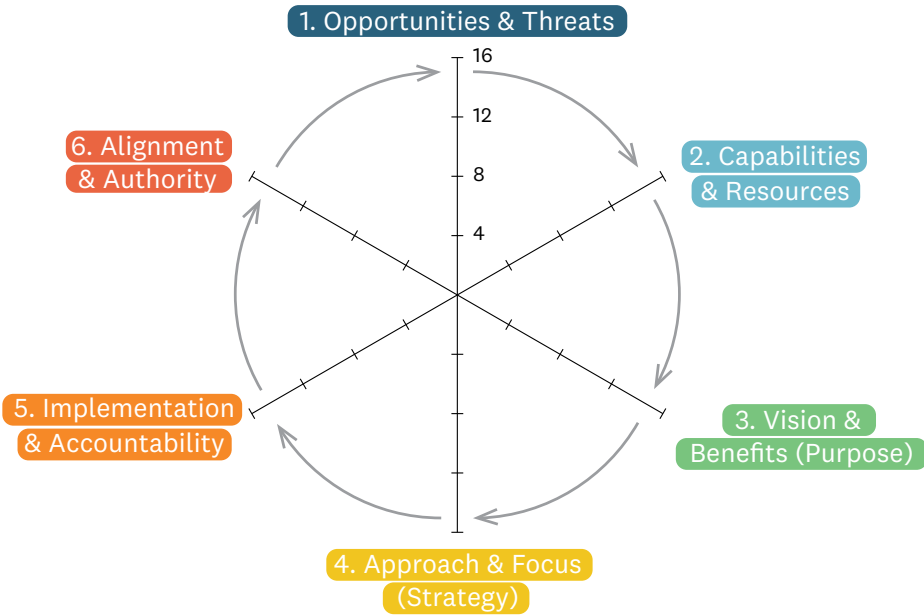

In 2021, one sub-element was removed: sub-element 6.3 of element 6: Alignment and Authority. This was because four-year plans are no longer required.⁹ This is a change from earlier scorecards (which featured 22 sub-elements).

To score element 6: Alignment and Authority, reviewers searched in other corporate documents, as well as the actual GDS, which was searched to see whether previously published GDSs were mentioned (vertical alignment). Reviewers also assessed whether the GDS was mentioned explicitly (i.e. by title) or implicitly in two corporate documents (horizontal alignment). Implicit mentions meant that key words related to the GDS were mentioned. These were determined through an additional read of the strategy document to distinguish key themes that the strategy document might discuss. For example, the Department of Corrections did not specifically mention its GDS [GDS03-02] *Our alcohol and other drug strategy* (October 2021) in its *Statement of Intent 2021-2022*. However, the *Statement* did mention ‘alcohol and other drugs’, and therefore the GDS was considered to have been implicitly mentioned.

Formulation of the conceptual framework

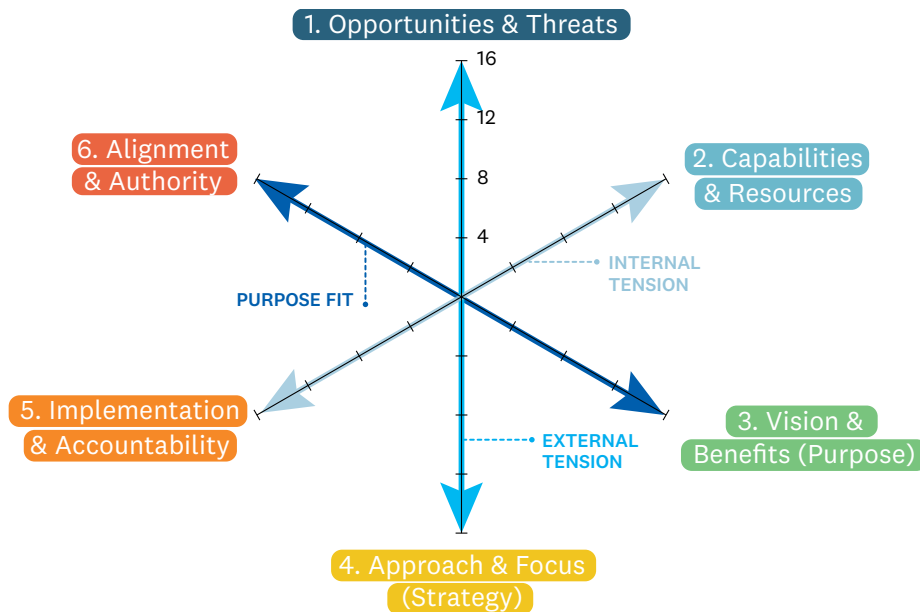

The elements in the Transparency Scorecard are in the sequence that is often used to create a strategy, starting with Opportunities and Threats. This is shown by the arrows in Figure 3.4.

Figure 3.4: The logical sequence to create a GDS

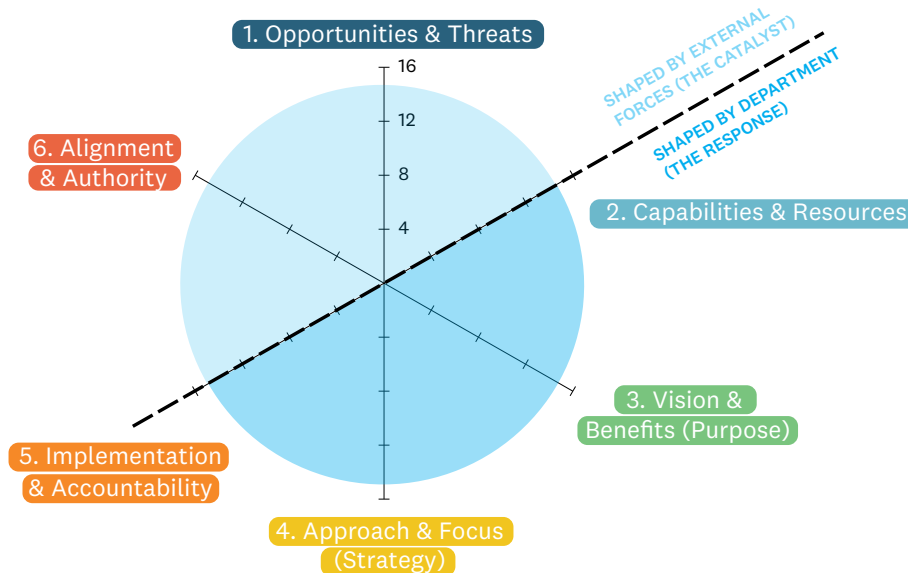

There are some tensions that naturally exist between elements. These help to optimise strategy design. This is illustrated in Figure 3.5. The ‘External Tension’ calls for the strategy to balance and match the GDS’s Approach and Focus with its scoping of the external environment in Opportunities and Threats. The ‘Internal Tension’ calls for the strategy to match Capabilities and Resources with Implementation and Accountability. Lastly, the ‘Purpose Fit’ calls for the strategy to bring into line the Purpose, Vision and Benefits with the Alignment and Authority requirements.

Figure 3.5: The three natural tensions between elements to optimise strategy design

It is also important to recognise that government departments have little control over certain aspects of the landscape in which they operate. Their task is therefore to learn and respond to the environment and use their skills, patience and commitment to shape outcomes over the long term. The dashed line in Figure 3.6 delineates the elements that are more or less under a department’s control: Elements 1 and 6 are generally outside the department’s control.

Figure 3.6: Understanding what departments can control

Changes to the 2023 Transparency Scorecard

Other than a few small edits, there were no changes to the 2023 Transparency Scorecard. However, there was a change in the scoring process, see Table 3.1 opposite, and Figures 3.7 and 3.8. The reviewers, indicated in Table 3.1 below, are young New Zealanders with backgrounds in economics, law, finance and public policy. They are, in practice, the ideal audience for GDS documents – they have minimal preconceived biases about government departments and their policies, but are interested in effective public policy.

Table 3.1: GDS Index reviewers 2014–2023

Reviewer	2014 GDS Index (as at 30 June 2014)	2015 GDS Index (as at 30 June 2015)	2018 GDS Index (as at 31 December 2018)	2021 GDS Index (as at 31 December 2021)	2023 GDS Index (as at 31 December 2023)
Reviewer 1 30 minutes	George	Madeleine	Madeleine	Gemma*	Eilish/Paddy
Reviewer 2 As long as needed	Madeleine	Karri	Wei Kai	Thomas*	-

*Note: With assistance from Eilish and Paddy.

Between 2014 and 2018, scores were often carried forward. This was on the basis that at least one reviewer had been involved in each of the three initial indexes and the time between reviews was not significant. However, in 2021, given it was seven years since some GDSs were scored, it was timely for all GDSs to be rescored.

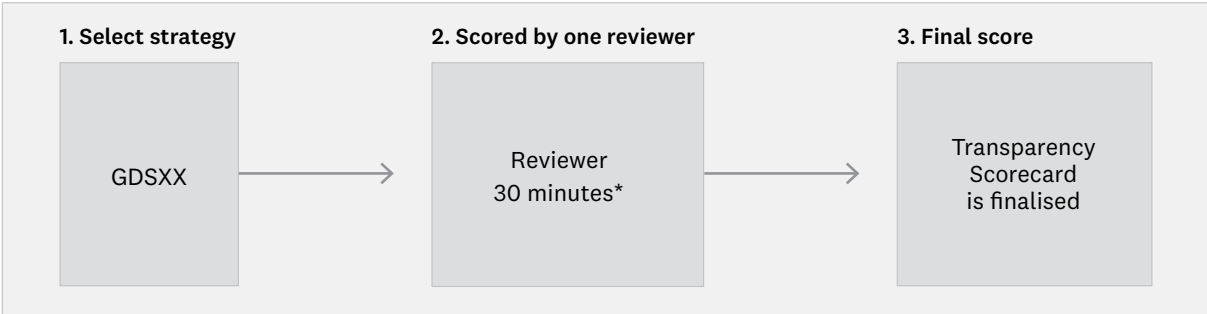

In the 2023 GDS Index, the scores from the 2021 GDS Index were carried forward and only the additions were scored.

Figure 3.7: 2021 Transparency Scorecard scoring method

*Note: 20 minutes reading the GDS, and 10 minutes scoring.

Figure 3.8: 2023 Transparency Scorecard scoring method

*Note: 20 minutes reading the GDS, and 10 minutes scoring.

For the 2023 GDS Index, only one reviewer was used. This resulted in some changes to the scoring process that was previously used, particularly: the scoring form was used only once; only physical copies of each GDS were used during the scoring process (with soft copies marked up later to evidence points); and the third party review of the Excel scoresheet did not occur as there were no variations to average or reassess (i.e. scores did not need comparing or resolving).

GDS scores from the 2021 GDS Index were carried forward (where GDSs were still active). To ensure a consistent standard of scoring was maintained, the 2023 GDS Index reviewer scored a random selection of GDSs from the 2021 GDS Index, and the results were cross-checked by a third party for any inconsistencies. It was very helpful that Eilish and Paddy had been involved in both the 2021 and 2023 indices.

Abbreviations

CLO	Crown Law Office
Corrections	Department of Corrections
DIA	Department of Internal Affairs
DOC	Department of Conservation
DPMC	Department of the Prime Minister and Cabinet
ERO	Education Review Office
GDS	Government department strategy
GCSB	Government Communications Security Bureau
HUD	Ministry of Housing and Urban Development
IRD	Inland Revenue Department
LINZ	Land Information New Zealand
MBIE	Ministry of Business, Innovation and Employment
MCH	Ministry for Culture and Heritage
MFAT	Ministry of Foreign Affairs and Trade
MFE	Ministry for the Environment
MOD	Ministry of Defence
MOE	Ministry of Education
MOH	Ministry of Health
MOJ	Ministry of Justice
MOT	Ministry of Transport
MFW	Ministry for Women
MPI	Ministry for Primary Industries
MPP	Ministry for Pacific Peoples
MSD	Ministry of Social Development
NZCS	New Zealand Customs Service
NZSIS	New Zealand Security Intelligence Service
OT	Oranga Tamariki—Ministry for Children
PSC	Public Service Commission
SFO	Serious Fraud Office
StatsNZ	Statistics New Zealand
TPK	Ministry of Māori Development—Te Puni Kōkiri
Treasury	The Treasury

Glossary

Adaptation (climate intelligence scoring)

Responding to the effects of climate change (e.g. moving from impacted areas).

Archived GDS

The department responsible for the GDS has advised it is no longer active. Occasionally, a department retrospectively advises the Institute of a strategy that should have been included in a previous GDS Index, but is no longer active. In this situation, the GDS is included in the current GDS Index as ‘active’, then moved immediately to ‘archived GDSs’. For this reason, it is not scored, and does not appear in the *Handbook*.

Basic response (climate intelligence scoring)

The GDS contains some discussion on climate change impacts and/or how it hopes to deliver better climate outcomes in terms of mitigation and/or adaptation but does not explain any detail (e.g. the GDS states it plans to do more research but does not explain what, when or how).

Both mitigation and adaptation (climate intelligence scoring)

Simultaneously responding to the causes and effects of climate change (e.g. reducing emissions while also moving from impacted areas).

Budget goals and objectives

The Government’s overarching goals are generally set out in the *Budget Policy Statement*. However, there exist a wide range of terms used to describe the broader goals and objectives of Government.¹⁰

Capabilities

Soft skills (including existing relationships and in-house expertise). See also resources.

Climate intelligence

The GDS contains some form of climate intelligence (i.e. a basic or detailed response to climate change impacts)

Criteria (GDS selection)

The criteria developed by the Institute to determine whether a document is a GDS.

Detailed response (climate intelligence scoring)

The GDS contains a detailed discussion of climate change impacts and how it will deliver better climate outcomes in terms of mitigation and adaptation (e.g. the GDS contains several clear and measurable next steps, explaining what, when and/or how).

Element (Transparency Scorecard)

An element is a characteristic that is considered of primary importance in the publication of a GDS. In the GDS Index, six high-level elements make up the Transparency Scorecard.

Explicit mention of a GDS

This is where either (i) the exact title of the GDS is stated, or (ii) the full title is not given or the subtitle is missing, but the supporting information and/or context makes it clear which GDS is being referred to.

Externally facing strategy (GDS selection)

An externally facing strategy considers matters outside of the general operations of the department.

Good strategy

Determining what makes a good strategy is a matter of judgement. One aim of the GDS Index is to invite departments to be more transparent, so that citizens can make their own assessments on the quality of strategy.

Government department

The term ‘government department’ refers to the list of entities found in Schedule 2, Part 1 of the Public Service Act 2020. The GDS Index reflects the list in the Schedule in terms of the department’s name and order.

Since the *2021 GDS Index*, three changes have been made. On 1 July 2022, Te Kāhui Whakamana Rua Tekau mā Iwa—Pike River Recovery Agency was disestablished. In 2024, the Ministry for Regulation and the Social Investment Agency were added to Schedule 2 of the Public Service Act 2020. However, as this was after December 2023, the *2023 GDS Index* does not include these two new departments.

Government department strategy (GDS)

A ‘government department strategy’ must:

1. be a publicly available document that is published by a government department
2. be a public-facing document that is written for the public to read
3. be an externally facing document (i.e. it is not written for internal management purposes)
4. be a strategic document that contains long-term thinking (i.e. it sets out the approach (the means) and the purpose (the ends) of the strategy)
5. be a national document (i.e. it excludes local and regional strategies)
6. be a document that looks forward at least two years or more, and
7. not be a corporate document (i.e. not a statement of intent, a four-year plan or an annual report).

Government targets

Government Targets are six-year aspirations set by the current Government and are expected to be delivered by 2030. The targets aim to achieve better results on public services and priorities that matter to New Zealanders.¹¹

Implicit mention of a GDS (Transparency Scorecard)

This is where the GDS is indirectly mentioned in the statement of intent or annual report (i.e. not word for word). The test is if there is some doubt as to whether the strategy is being referred to (e.g. the department’s energy strategy).

Internally facing strategy (GDS selection)

A strategy document that focuses solely on the internal management and/or operations of a department (e.g. it focuses on the department’s staff diversity and inclusion policies or the sustainability practices related to how the department manages its resources).

Jointly held GDS

A GDS that is owned and managed by two or more departments.

May issue (voluntary legislation)

The GDS is a voluntary requirement in legislation. Terms often used are ‘may issue’, ‘may allocate responsibility for’, or ‘may approve’. For example, ‘may approve’ relates to two fisheries GDSs, where the GDSs themselves say they were developed under the Fisheries Act, but the Fisheries Act says ‘May ... approve ... a fisheries plan’, implying that the GDS may have been developed under the Fisheries Act.

Mention only (climate intelligence scoring)

The GDS mentions climate change and may discuss its impacts, but it does not go into any detail on how it hopes to deliver better climate outcomes in terms of mitigation and adaptation.

Merged (combined)

Where two documents are significantly integrated (e.g. either two strategy documents, or a strategy document and an implementation plan/action plan), they are combined into one PDF and treated as a single GDS.

Mitigation (climate intelligence scoring)

Responding to the cause of climate change (e.g. reducing greenhouse gas emissions).

Narrow scope (scope scoring)

The nature of the subject matter discussed by the GDS relates to a group of individuals or species, or covers a specialised topic (e.g. hoiho penguin, syphilis).

No mention (climate intelligence scoring)

The GDS does not mention climate change at all.

Points (Transparency Scorecard)

Points are allocated to each sub-element. In the GDS Index there are 21 sub-elements. Seventeen of those are given four points each for a reviewer to score. Two sub-elements (6.2 and 6.3) are allocated six points each. The remaining two (sub-elements 1.3 and 3.3) are allocated eight points each. This additional weighting recognises the importance of these sub-elements. The highest possible total in the GDS Index is 96 points.

Purpose statement (the ends)

An aspirational future-focused statement that explains in a concise, unique, coherent and specific way what the strategy aims to achieve and provides an impetus for action (e.g. the purpose statement sets out what success looks like).

Rank (Transparency Scorecard)

The rank reflects where a specific GDS, department or sector sits when its Transparency Scorecard totals are compared to the average score of all GDSs, the average score of the department by which it is held, or the average score of its sector.

Regulatory Management System (RMS)

RMS is the set of policies, institutions, processes and tools used by central government to pursue and maintain good quality regulation. The responsibility for New Zealand's RMS was with The Treasury but has now moved to the newly established Ministry for Regulation. Some GDSs are specifically mentioned in legislation by name as being mandatory while others are less specific (see 'required' and 'may issue' in this glossary). Importantly, even when a GDS is not mentioned specifically by name in law, GDSs are one of the key tools of the RMS. This is because GDSs implement public policy set by Cabinet or in law. A good example is the Public Service Act which specifies that chief executives have responsibility for stewarding the legislation their agencies administer.¹²

Rejected

A document is rejected when the Institute and the department conclude it does not meet the criteria, in which case it is never added to the GDS Index. In the rare case of a disagreement, the final decision is the Institutes's.

Required (mandatory legislation)

The GDS is a mandatory requirement in legislation. Terms often used are 'must' or 'shall'.

Resources

Physical hardware (including physical and financial assets). See also capabilities.

Reviewer (Transparency Scorecard)

A person who is employed by the Institute to read and then score each GDS in operation against the Transparency Scorecard.

Score (Transparency Scorecard)

The number of points a GDS has accumulated as a result of the scoring process.

Sector

The groupings of departments based on the summary tables of the Estimates of Appropriations in the Treasury's Budget (in the *2023 GDS Index*, it is the 2023 Budget). The introduction to each volume of the Estimates of Appropriations 2024/25 explains how Votes and departments have been grouped into sectors. The 2023 Budget sector groupings are:

- Economic Development and Infrastructure
- Education and Workforce
- External
- Finance and Government Administration
- Health
- Justice
- Māori Affairs
- Natural Resources
- Social Services and Community

Strategic options

The range of options a government department might explore before deciding on the best approach. Exploring a range of strategic options often leads to a new and improved approach.

Strategy map

A visual illustration of the proposed strategy, usually on one page, showing the cause-and-effect relationships between the desired purpose and the choices made on how to achieve the strategy (e.g. types of goals/priorities/themes/actions capabilities/resources).

Strategy statement (the means)

The 'means' to an end. The unique approach a department has chosen to adopt to bring about change. It describes the choices made.

Sub-element (Transparency Scorecard)

In the GDS Index there are 21 sub-elements shared across six elements.

Transparency Scorecard

The lens through which each GDS has been assessed. The Transparency Scorecard is made up of six elements and 21 sub-elements.

Wide scope (scope scoring)

The nature of the subject matter discussed by the GDS relates to a broad range of demographics or species, and/or covers a generalised topic (e.g. seabirds, climate change).

Generally GDSs with a wide scope tend to be more strategic and high-level than narrow scope strategies. For example, a GDS focusing on the wellbeing of all New Zealanders (which would be considered to have a wide scope) may lead to development of a more specific strategy, such as a strategy focusing on the wellbeing of New Zealanders in aged care (which would be considered narrow in scope).

Worksheet 1: How to create the OIA Excel

Note: The following explains how this process was undertaken for the 2023 GDS Index. Please note the process for the 2024 GDS Index has been further streamlined but is not included below.

Outlined below is the process by which the raw data for a GDS Index update is collected. As in any research process, the process for gathering and refining the data is amended and refined as issues and questions are raised and answered, and so a degree of back and forth between process stages is to be expected. Specific issues and questions are considered in the technical questions section at the end of this worksheet.

Inputs

Previous GDS Index Master Excel (to be saved as new Master Excel)
Sector tables from the latest Budget rounds
Schedule 2, Part 1 of the Public Service Act 2020 as it lists the official names of government departments

Process

Search for strategies on each government department website and add new potential strategies to the Master Excel
Email out OIA request of possible status of GDSs held by the department
Create OIA Excel document of all responses
Create folders of all GDSs in operation (hard and soft copies)

Outputs

New GDS Index OIA Excels
This data is used to create the *2023 GDS Index Handbook – He Puna Rautaki* and the table of operational GDSs on the McGuinness Institute’s website, and update the two tables on the McGuinness Institute’s website (the table of operational GDSs and the table of archived GDSs).

Stage 1 – Master Excel

Use a new copy of the previous Master Excel to begin creating the list of operational GDSs. This Excel will have all the operational GDSs from the previous Index and will have the new GDSs added to it.

The Master Excel should have a sheet for each department, so that departments are able to easily find their strategies.

Each sheet should have a column for:

1. Index number
2. Government department currently holding the GDS
3. Title of strategy on GDS Index
4. Publication date
5. Duration
6. This GDS replaces
7. Jointly held with
8. Transferred from
9. Link to GDS (the web page the strategy is on)
10. McGuinness Institute’s comments and questions
11. Response from (insert department)

Stage 2 – Collect strategies

Note: This step has changed since *Working Paper 2022/01 – Methodology for the 2021 Government Department Strategies Index* so that Chief Executives only need to check, fix and confirm our list of GDSs rather than fill out the Excel on our behalf.

On each government department website, search for the terms ‘strate’ (which covers strategies and strategy) and ‘plan’ to find any potential GDSs. If any GDSs that are published post-31 December 2022 are found (for the *2023 GDS Index*), add them to the new copy of the previous Master Excel.

Note: It is the Institute’s preference that strategies are called strategies, rather than ‘action plans’ or ‘plans’. However, as this is not the case for many GDSs (particularly in the *2023 GDS Index*) the search needs to include the term ‘plan’ so no strategies are missed.

To broaden the search, search for the same terms on both the Parliamentary website and New Zealand Legislation website to ensure we have found all new GDSs.

Stage 3 – Preparing OIA requests

Once the Master Excel has the potential GDSs added to it, the Excel can be sent out to Chief Executives to confirm the list.

1. Compile a list of all government department CEO names and their contact emails, as well as the general OIA email for each government department.
2. Compile lists of GDSs for each department and send them to the relevant Chief Executive, asking for them to (a) review the list of existing GDSs (and advise if any have expired – and when); (b) review our list of additions, asking if they agree they are within scope; and (c) advise if we have missed any potential GDS documents.

Stage 4 – Processing OIA responses

Once the government departments have answered the OIA requests, their responses must be processed to determine whether the new GDSs fit the McGuinness Institute criteria and to formulate the additions and deletions lists.

Gather the collected information by:

- printing out all correspondence with each government department
- printing out all Excel spreadsheets that each government department has prepared
- printing out all new PDFs provided by government departments, and
- filing these documents by department (alphabetically) and in date order of GDS document (most recently published first) in a white folder.

Review each OIA response to determine whether respondents have provided the Institute with any new documents and, if so, whether these align with the Institute’s definition of a government department strategy (GDS). See verification processes below, and section 4.2 of this working paper for the definition.

If further clarification for a GDS is required, send another OIA email to the respective department to confirm. This can often be a back-and-forth process.

Stage 5 – OIA email of thanks

1. Email each Chief Executive (or person corresponding in regard to the OIA) to thank them for their OIA responses, and send them the final list of GDSs for their respective department.

Stage 6 – upload GDSs and OIA correspondence onto the McGuinness Institute website

1. Upload/update the final list of operational GDSs since 1994 and the list of archived GDSs on the McGuinness Institute website.
2. Upload all OIA correspondence onto the OIA table with the name of the person(s) emailing redacted.

Verification process of GDSs (1 & 2)

Verification process 1: Initial review

During the process of receiving OIA responses from government departments, each strategy needs to be reviewed against the McGuinness Institute GDS criteria. If a strategy does not meet all of the criteria it is not considered a GDS. In the *2023 GDS Index*, this led to seven strategies being immediately rejected as they did not meet the criteria (see Appendix 4 for the list of rejected GDSs).

Verification process 2: Detailed review

After a deep review of each strategy, 18 further strategies were rejected that did not meet the criteria (see Table A4.2 in Appendix 4).

All rejected strategies are kept track of and put into a 'GDS rejects folder'.

Worksheet 2: How to create the Master Excel

The following explains how this process was undertaken so that it can be replicated by future McGuinness Institute staff.

The Master Excel is updated with each GDS Index update. It tracks all GDS documents from 1994 to the present day (in this case, 31 December 2023).

Note: Where the Institute is quoting material from a GDS such as the strategic approach, purpose, or a more general piece of text, the page number used is the page number that is provided on the document itself, not the PDF viewer. This protocol applies across all of the *2023 GDS Index* publications.

Table W2.1: Master Excel columns defined

Information sought	Objective	Explanation
Title of strategy on GDS Index	To establish a unique and easily identifiable name for each GDS while avoiding repetition.	<ul style="list-style-type: none"> This information is found in the <i>2023 GDS Index Handbook – He Puna Rautaki</i> and the table of operational GDSs on the McGuinness Institute’s website. This information is taken from the front cover of the GDS, where necessary with the following modifications: <ul style="list-style-type: none"> If ‘the’, ‘New Zealand’, ‘NZ’, ‘Aotearoa’ or a government department name or acronym is at the beginning or end of a GDS title, it is removed. Note: This action is repeated for te reo titles where applicable. Subtitles are not included unless there is no other way of knowing what the GDS relates to. Note: The <i>2023 GDS Index Handbook – He Puna Rautaki</i> includes an image of the cover of the GDS, which often includes the subtitle. Where a subtitle is included, a colon is used to separate it from the main title. If branding (usually a statement or slogan linking various documents together as part of a series or collection) is present on the document cover, it is not considered part of the title. For example, the cover of <i>Corrections’ GDS Health and Safety Strategy 2016–2020</i> has the text ‘Everyone Safe Every Day’ prominently displayed, but it has not been treated as part of the title as it forms a brand for a series of GDSs. English and te reo Māori titles (or titles in other languages), where present, are both used, and in the order they are presented on the GDS document’s cover. For consistency, and to ensure that they are presented with equal weighting, English and te reo are separated by an en dash (as opposed to a colon, which would suggest a hierarchical or explanatory relationship between the languages as titles). For example, DIA’s [GDS04–01] <i>Te Huri Mōhiotanga Hei Uara: Nga Tohutohu Rautaki Ki 2030 – Turning Knowledge into Value: Strategic Directions to 2030</i>. Note: The use of an en dash in a title is reserved for this purpose only. For series of GDSs, i.e. GDSs that are updated every few years under the same name, the duration/date of the GDS is included in the title in order to distinguish from previous GDSs, e.g. <i>Strategy to Prevent and Minimise Gambling Harm 2022/23 to 2024/25</i> has the duration included in its title to distinguish it from the previous <i>Strategy to Prevent and Minimise Gambling Harm 2019/20 to 2021/22</i>. If a strategy only contains an end date in its title, that date is kept in our title in the <i>2023 GDS Index Handbook – He Puna Rautaki</i>. This is because it brings necessary clarity to the intention of the strategy. For example, [GDS02–10] <i>Predator Free 2050 Strategy</i> and [GDS09–01] <i>Cadastre 2034</i>. Where a GDS comprises several separate documents that work together (e.g. one document might outline the strategy, and a secondary document might outline the action plan to achieve the strategy), the title of the primary strategy document is used, and a note listing the titles of all separate documents is added below. Titles appear in title case, even if the title does not appear this way on the document itself. This does not apply to subtitles, which will appear in sentence case.

Information sought	Objective	Explanation
Date published	To establish the year and month each GDS was published.	<ul style="list-style-type: none"> This information is found in the <i>2023 GDS Index Handbook – He Puna Rautaki</i> and the table of operational GDSs on the McGuinness Institute’s website. The publication date (year and month) is taken from the GDS itself (typically from the front or inside cover). If the GDS document does not indicate its publication date, its department’s website is checked for any indication of when the GDS was published. If a date cannot be found the website is checked for press releases, web pages or other documents to determine proof of publication. If the date still cannot be located, this information is sought through OIA requests and follow-up communications. Note: The Institute would prefer GDSs to have the publication date stated in the strategy document. For strategies that do not state the publication date (where the date is found from another source instead) it is stated in the <i>2023 GDS Index Handbook – He Puna Rautaki</i> that the information could not be found in the strategy. Date ranges for publication dates are only used in certain circumstances and have been treated differently dependent on the circumstances. <ul style="list-style-type: none"> For example, Inland Revenue’s (IRD’s) <i>Our Corporate Strategy</i> was found to be a collection of six separate ‘strands’, which together form a GDS. These strands were published separately, from May to September 2016. As a result, the date of publication for this GDS is indicated with a month range, rather than a single publication date (as May–September 2016). For example, a specific month-year publication date for Corrections’ <i>National Historic Heritage Strategy</i> could not be found. It was established through correspondence that it was published between October and December 2013, and so the publication date was recorded as ‘October–December 2013’.
Duration in operation	To first establish the length of time that the GDS is intended to be in operation for (year range and number of months), and secondly to help understand how the GDSs fit into a tendency towards political short-termism or long-termism.	<ul style="list-style-type: none"> This information is found in the <i>2023 GDS Index Handbook – He Puna Rautaki</i> and the table of operational GDSs on the McGuinness Institute’s website. It is presented as year-year (number of months). The duration, in the first instance, is taken from the year range as stated on the cover of the GDS document if present. If a month is included as part of the range it is assumed to be the equivalent month in the end year as well (for example, if published in June 2014 and indicated to last ten years, it is assumed to end in June 2024). If a date range is indicated within the date range (e.g. 2017/18–2020/21), the earliest years from each range are taken (i.e. 2017–2020). <ul style="list-style-type: none"> For example, the front cover of MOT’s [GDS24–08] <i>Government Policy Statement on Land Transport</i> gives year ranges for its duration: 2018/19–2027/28. The duration was recorded as 2018–2027. If there is no year range stated by the GDS, the year of publication is taken as the start date and the end date is recorded as NK (‘Not Known’). When a strategy has passed the end date that the document states, but a department has said the strategy is still active in an OIA, the end date is changed to Not Known (NK), with the original end date stated in brackets, e.g. for the <i>Government Tourism Strategy</i>, the duration is listed as 2019–NK (was initially 2020). If a strategy ends in 2023 and the department has said it is still active but will be replaced, refreshed or updated in 2024, the strategy has been considered as ending in 2024. For example, DIA’s [GDS04–07] <i>Charities Services Research Strategy</i> initially ended in 2023, but in an OIA, they informed us that the strategy is active and will be refreshed in 2024. Therefore, the duration has been given as 2020–2024 (was initially 2020–2023). Sometimes the duration dates and the publication date of a document do not align. <ul style="list-style-type: none"> For example, the <i>National Civil Defence Emergency Management Strategy</i> was published in March 2008, but its duration was indicated on the inside cover as beginning in 2007 (there was no end date indicated). As a result, this GDS has been recorded as having a publication date of March 2008, and a duration of 2007–NK. As with the publication date, the Institute considers it important for the strategy to state the duration. If the duration cannot be found within the strategy, it is stated that the information was not found in the strategy. This is in the <i>2023 GDS Index Handbook – He Puna Rautaki</i>.

Information sought	Objective	Explanation
Number of pages	To determine the length of GDS documents. This also helps to establish the range of lengths of GDSs.	<ul style="list-style-type: none"> This information is found in the <i>2023 GDS Index Handbook – He Puna Rautaki</i> and the table of operational GDSs on the McGuinness Institute’s website. It is found by counting the number of PDF pages. The front cover counts as page 1 and each page up to the very back cover (irrespective of whether there is text on the page) is included in the count. For GDS documents presented as A3, each half of an A3 page counts as one page. <p>Note 1: When referencing text from a GDS, the page number presented in the document is used.</p> <p>Note 2: Where GDS documents have been merged, the combined total of each of their page numbers is used and a note stating that this is the combined total is included. For example, ‘Number of pages: 72 (combined)’.</p>
Signed by (general)	To establish the level at which the GDS is publicly signed without identifying the specific signatory.	<ul style="list-style-type: none"> This information is found in the <i>2023 GDS Index Handbook – He Puna Rautaki</i> and the table of operational GDSs on the McGuinness Institute’s website. This information is derived from the next row, ‘Signed by (detail)’, with the signatories categorised into the following: ‘Crown’, ‘Chief Executive’ (‘CE’), ‘Department staff (other than CE)’, ‘Not signed’, ‘Other’ (if someone other than the above), or combinations of these, for example Chief Executive and other department staff. Director-General, Secretary to ..., Solicitor-General (CLO), Chief Review Officer (ERO), Director (SFO), Comptroller (NZCS), Government Statistician (Stats NZ) and Commissioner (SSC) or any other role that is highest within a department are considered in this context to be at the same level as CE, so are recorded as CE. Surveyor-General (LINZ), Convenor (MOT) and Deputy Chief Executive/Deputy Director-General are not considered in this context to be at the same level as CE, and so are recorded as ‘Department staff (other than CE)’. The role title and the category are both mentioned in the <i>2023 GDS Index Handbook – He Puna Rautaki</i>. For example, ‘Crown’ (Minister for the Prevention of Family Violence and Sexual Violence). If a GDS has a name stated but does not have a signature, it still counts as being signed.
Signed by (detail)	To establish the level at which the GDS is publicly signed by identifying the specific signatory.	<ul style="list-style-type: none"> This information is found in the <i>2023 GDS Index Handbook – He Puna Rautaki</i> and the table of operational GDSs on the McGuinness Institute’s website. This information is found in the GDS document, usually through a signed foreword or similar, and is not sought anywhere else. The title, name and office of the signatory (e.g. Hon Name of Minister, portfolio; name, position in organisation) is recorded as written in the GDS document. This means that the Minister’s full title is the name used when the document was signed. For example, in the case of [GDS19–15] <i>Health Research Strategy</i> (June 2017), the Minister is the Minister of Science and Innovation (i.e. the current title, the Minister for Research, Science and Innovation, is not used). <p>– Note: This section highlights information made public by the GDS document itself. If the document does not give a person’s name it is treated as not signed. The Institute is aware of GDS documents that are not signed, but have been officially signed off by relevant parties such as Cabinet. For example, the <i>New Zealand Migrant Settlement and Integration Strategy</i>, archived in the <i>2018 GDS Index</i> update, was not signed. However, the strategy itself (as opposed to the document) was signed off by Cabinet. To obtain this additional information for all GDSs is beyond the scope of this research.</p>

Information sought	Objective	Explanation
This GDS replaces	To record the history of strategies over time.	<ul style="list-style-type: none"> This information is found in the <i>2023 GDS Index Handbook – He Puna Rautaki</i> and the table of operational GDSs on the McGuinness Institute’s website. This information is found through the title of the previous strategy (either indicated in the GDS or by OIA and correspondence). If the earlier GDS was held by a different department, note this information in brackets along with the year of publication. <ul style="list-style-type: none"> For example, the <i>Energy Strategy 2011–2021</i>, archived in the <i>2023 GDS Index</i>, was held by MBIE, and replaced the <i>National Energy Efficiency and Conservation Strategy (2001)</i>, originally held by MFE. Where departments have noted documents that have been replaced in their OIA correspondence but they have not been considered a GDS by the Institute in previous indexes, they have not been included in this section. <ul style="list-style-type: none"> For example: DPMC’s OIA notes that [GDS05–04] <i>National Fuel Plan</i> replaced the <i>Oil Emergency Response Strategy (2008)</i> and <i>National CDEM Fuel Plan</i>. The former has been included as it was listed in the <i>2021 GDS Index</i>. The latter has not been included as it was never considered a GDS.
Jointly held with	To record which GDSs are held by more than one government department.	<ul style="list-style-type: none"> This information is found in the <i>2023 GDS Index Handbook – He Puna Rautaki</i> and the table of operational GDSs on the McGuinness Institute’s website. This information is looked for ‘in the first instance’ in the GDS document. It is then confirmed by the OIA response and correspondence. If the information is not in the GDS document, it is obtained by the OIA request and correspondence. GDSs held by more than one department are included as a GDS for each department. <ul style="list-style-type: none"> For example, the GDS <i>Mātauranga Whakauka Taiao – Environmental Education for Sustainability</i> is jointly held by the Department of Conservation and the Ministry for the Environment. It is included in the <i>Handbook</i> under both departments and has two GDS numbers, [GDS02–04] and [GDS13–03].
Originally published by	To record who originally published the GDS.	<ul style="list-style-type: none"> This information is found in the table of operational GDSs on the McGuinness Institute’s website. This information is looked for ‘in the first instance’ in the GDS document. It is then confirmed by the OIA request and correspondence. If it is not in the GDS document, it is obtained by the OIA request and correspondence. <ul style="list-style-type: none"> For example, the <i>National Civil Defence Emergency Management Strategy</i> was originally published by the Department of Internal Affairs (DIA), but was later held by the Department of the Prime Minister and Cabinet (DPMC). Ownership of the GDS was transferred from DIA to DPMC after the Christchurch earthquakes. This was confirmed to the research team via an OIA request.
Transferred from	To establish where the GDS is transferred to if it is no longer owned by the government department that originally published it.	<ul style="list-style-type: none"> This information is found in the <i>2023 GDS Index Handbook – He Puna Rautaki</i> and the table of operational GDSs on the McGuinness Institute’s website. This information is looked for ‘in the first instance’ in the GDS document. It is then confirmed by the OIA request and correspondence. If the information is not in the GDS document, it is obtained by the OIA request and correspondence.
Whether in operation or has been archived	To establish that the GDS is operational for the year end to which the GDS Index relates.	<ul style="list-style-type: none"> This information is found in the tables of operational and archived GDSs on the McGuinness Institute’s website. Confirmed via OIA request (as stated, durations in the GDSs themselves can change without the documents themselves being updated).
Strategic approach	To establish, in a statement, what the GDS is at its core (essentially, what is the strategy?).	<ul style="list-style-type: none"> This information is found in the <i>2023 GDS Index Handbook – He Puna Rautaki</i> and the table of operational GDSs on the McGuinness Institute’s website. The strategic approach is a statement generated by McGuinness Institute staff in order to articulate, briefly, what the strategy is.

Information sought	Objective	Explanation
Externally focused	To establish whether the direction of focus of a strategy looks outward.	<ul style="list-style-type: none"> This information is found in the <i>2023 GDS Index Handbook – He Puna Rautaki</i> and the table of operational GDSs on the McGuinness Institute’s website. This information is generated by Institute staff using the following definitions: <ul style="list-style-type: none"> External: The strategy focuses on subject matter outside of the department (e.g. environment, public health, poverty) and therefore meets criterion 3. Note: An externally facing strategy can be focused on the operations of the department (i.e. how technology is used by the department in their processes) but must not consider personnel. Internal: The strategy focuses on the operations of the department itself (e.g. information management, staff diversity) and therefore does not meet criterion 3.
Government sector	To establish which sector each GDS comes under.	<ul style="list-style-type: none"> This information is found in the Treasury’s 2023 Budget in <i>The Estimates of Appropriations for the Government of New Zealand for the Year Ending 30 June 2024</i>.¹³ Two government departments straddle two sectors: the Ministry of Business, Innovation and Employment and Ministry of Justice. The Institute took a view on what GDS related to what sector based on the respective topic. This was previously advised to the relevant departments in an email of 22 February 2022, during research for the <i>2021 GDS Index</i>, seeking their feedback. In Budget 2023, these two departments still straddled the same two sectors.
Published during a Labour- or National-led Government	To track which governments have produced which GDSs.	<ul style="list-style-type: none"> This information is found in <i>Nation Dates (2023)</i>, Chapter 6 (pp. 317–321). This information is determined by the McGuinness Institute by comparing the publication date (see row above) with the dates the governments held office.

Worksheet 3: How to create the Transparency Scorecard Excel

Note: The purpose of this worksheet is to explain how the Transparency scoring process is undertaken so that it can be replicated by future McGuinness Institute staff.

Aside from the four sub-elements that were weighted with values of either six or eight (in order to represent their greater importance), each sub-element was scored in whole numbers out of four. Although this resulted in a total possible score of 96 (which is not the most intuitive total – 100 being the obvious choice), this decision was made to encourage reviewers to judge each GDS as precisely as possible. The reviewers had to consider the sub-element score carefully, as they were unable to pick the uncontroversial ‘middle mark’ (three, if the sub-elements were scored out of five, for example).

Jointly held GDSs are scored once. The scores are used for each mention of the GDS. The only exception to this rule is for scoring sub-elements 6.2 and 6.3, as they involve comparisons between the GDS document and other corporate documents published by the respective government departments.

Inputs

- New GDS Index Master Excel (from Worksheet 1)
- Previous GDS Index Transparency Scorecard Excel Document (to be saved as new Transparency Scorecard Excel)
- Folder of all GDSs in operation (hard copies)
- Transparency Scorecard form (in green)

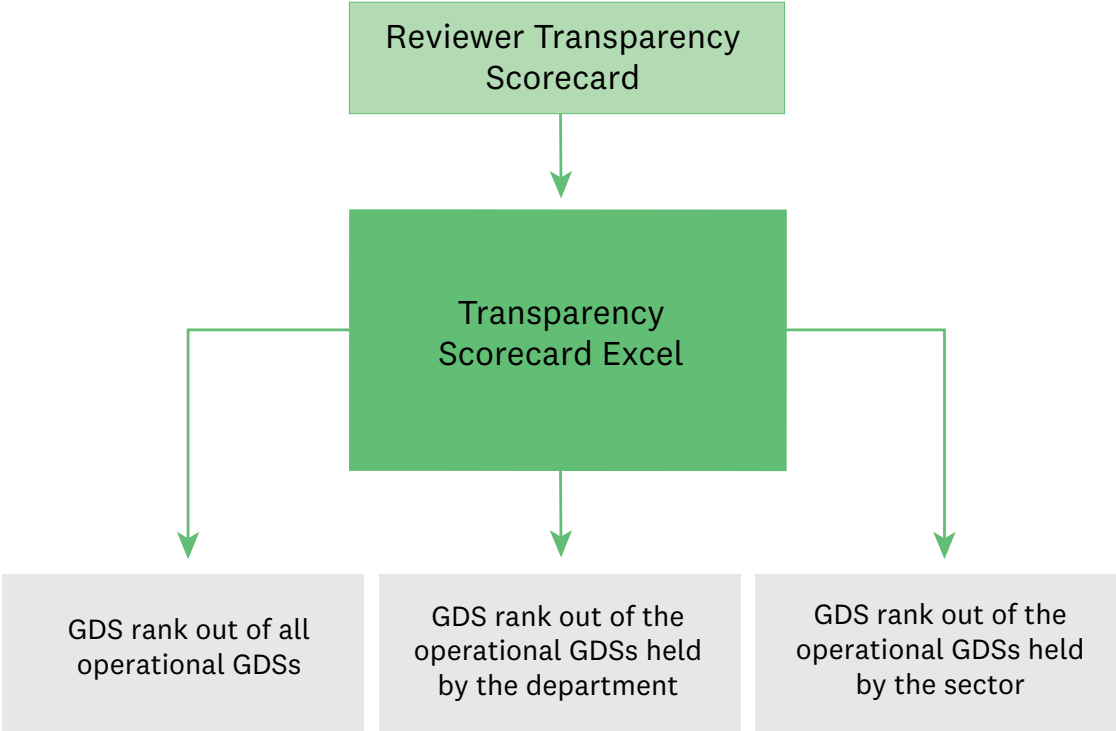

Process

- Reviewer completes the scoring process

Outputs

- New GDS Index Transparency Scorecard Excel
- This data is used to provide GDS scores and rankings for the *Handbook*

Figure W3.1: Transparency Scorecard Excel structure

Stage 1: Scoring GDSs described in more detail

Element 1: Opportunities and Threats

What is the external environment?

- 1.1 Does it identify potential opportunities going forward?
- 1.2 Does it identify potential threats going forward?
- 1.3 Does it contain a clear statement describing the problem that this strategy is trying to solve?

Sub-element 1.1. Does it identify opportunities going forward? [4 points]

The purpose of this question is to assess whether the GDS in question has outlined the opportunities which currently exist or may come about within the focus area if the strategy is implemented. Points are awarded based on the following scale:

0 points	The GDS makes no mention of any potential opportunities which may result if the strategy is implemented.
2 points	The GDS mentions potential opportunities which may result if the strategy is implemented, but they are not discussed in detail.
4 points	The GDS discusses comprehensively the potential opportunities which may result if the strategy is implemented. Examples and scenario case studies may be used, for example.

Sub-element 1.2. Does it identify threats going forward? [4 points]

The purpose of this question is to assess whether the GDS has outlined the threats which currently exist or may result within the focus area if the strategy is implemented. Points are awarded in the following way:

0 points	The GDS makes no mention of potential threats which may result from the implementation of its strategy.
2 points	The GDS mentions some potential threats which may result from the implementation of its strategy in minimal detail only. No examples are included.
4 points	The GDS discusses comprehensively potential threats which may result from the implementation of the GDS. Examples are included.

Sub-element 1.3. Does it contain a clear statement describing the problem that this strategy is trying to solve? [8 points]

This question examines whether the GDS clearly identifies the problem which it focuses on and aims to solve. This is important as a succinct identification of the issue is necessary for both the public and the public servants reading the GDS. This question was given a weight of eight points to represent its importance. Points are awarded in the following way:

0 points	The GDS makes no reference to the specific problem.
2 points	The GDS makes reference to the problem, but with no supporting detail.
4 points	The GDS makes reference to the problem, but the discussion of its nature and extent is limited, with no supporting evidence or examples.
6 points	The GDS discusses the specific issue it is focusing on, with reference to evidence describing the current situation. However, discussion is short or lacks depth.
8 points	The GDS makes detailed reference to the problem and describes its nature and extent. The GDS provides concrete details and supporting examples to illustrate any complexities of the problem.

Element 2: Capabilities and Resources

What are the internal strengths and weaknesses?

- 2.1 Does it identify current and future capabilities?
- 2.2 Does it identify what capabilities it does not have and needs to acquire or work around?
- 2.3 Does it identify current and future resources?
- 2.4 Does it identify what resources it does not have and needs to acquire or work around?

Sub-element 2.1. Does it identify current and future capabilities? [4 points]

This question examines whether the GDS outlines the capabilities currently available and necessary for implementation of the GDS. It asks whether this stocktake of capabilities also takes into account when and how they will be used in the future. Points are awarded in the following way:

0 points	The GDS makes no mention of current capabilities.
2 points	The GDS mentions capabilities currently available, but detail is limited.
4 points	The GDS discusses available capabilities, and it details comprehensively when and how these will be used to implement the GDS in the future.

Sub-element 2.2. Does it identify capabilities it does not have but needs to acquire or work around? [4 points]

This question examines whether the GDS outlines the capabilities that are necessary for the implementation of the GDS but are currently lacking. It asks whether this identification of lacking capabilities constructively discusses ways to account for or work around this need. Points are awarded in the following way:

0 points	The GDS makes no mention of missing capabilities.
2 points	The GDS mentions missing capabilities, but detail is limited. There is no discussion of how to work around the identified missing capability, resource or skill.
4 points	The GDS discusses missing capabilities, and it details comprehensively ways in which this can be accounted for or worked around so that the purpose is still achieved.

Sub-element 2.3. Does it identify current and future resources? [4 points]

This question examines whether the GDS outlines the resources available to its lead agency for its implementation. It asks whether this identification of available resources discusses when and how they will be used in the future. Points are awarded in the following way:

0 points	The GDS makes no mention of current and future resources.
2 points	The GDS mentions current and future resources, but detail is limited.
4 points	The GDS discusses available current and future resources, and it details comprehensively how and when these will be used to implement the strategy.

Sub-element 2.4. Does it identify resources it does not have but needs to acquire or work around? [4 points]

This question examines whether the GDS outlines the resources that are necessary for its implementation but are currently lacking. It asks whether this identification of lacking resources constructively discusses ways to account for or work around this need. Points are awarded in the following way:

0 points	The GDS makes no mention of missing resources.
2 points	The GDS mentions missing resources, but detail is limited. There is no discussion of how to work around the lack of resources.
4 points	The GDS discusses missing resources, and it details comprehensively ways in which this can be accounted for or worked around so that the purpose is still achieved.

Element 3: Vision and Benefits (Purpose)

What is the purpose?

- 3.1 Does it provide a clear aspirational statement as to what success would look like (a desired future state)?
- 3.2 Does it identify who the beneficiaries are and how they will benefit?
- 3.3 Does it describe how success will be measured and over what time frame?

Sub-element 3.1. Does it provide a clear aspirational statement as to what success would look like (a desired future state)? [8 points]

This question examines whether the GDS illustrates what its successful end output/s will look like. To achieve clear illustration of its purpose, the GDS must give readers a detailed understanding of the outputs that will result from its implementation. Points are awarded in the following way:

0 points	The GDS's purpose is not clearly stated or is absent altogether.
2 points	The GDS states its purpose in limited detail, with no explanation of desired end outputs.
4 points	The GDS states its purpose in limited detail, with some explanation of end outputs desired.
6 points	The GDS discusses a detailed image of what it is aiming to achieve, but without examples.
8 points	The GDS provides a detailed description of its purpose, with examples of desired end outputs and their connection to the strategic goals of the GDS.

Sub-element 3.2. Does it identify who the beneficiaries are and how they will benefit? [4 points]

This question examines how well the GDS analyses who will benefit from its implementation and how they will benefit. Points are awarded in the following way:

0 points	The GDS does not articulate who will benefit from the GDS.
2 points	The GDS articulates who will benefit from the GDS, but discussion of how they will benefit is poor and lacks detail.
4 points	The GDS articulates who will benefit from the GDS in detail, and it discusses the specific nature of this benefit.

Sub-element 3.3. Does it describe how success will be measured and over what time frame? [4 points]

This question examines the quality of the GDS's description of its implementation time frame and its description of indicators of its success. Points are awarded in the following way:

0 points	The GDS makes no reference to dates or time frames by which its goals should be implemented. There is no discussion of how its success will be indicated.
2 points	The GDS refers to the time frame in which the GDS's goals will be implemented, but these time frames are not specific. There is limited and undetailed mention of how success will be measured.
4 points	The GDS refers to the time frame in which the GDS's goals will be implemented in detail, with specific dates included at points. There is discussion of how each goal is linked to the overarching time frame, and the measures of success are highly detailed.

Element 4: Approach and Focus (Strategy)

What choices and trade-offs have been made?

- 4.1 Does it break down the purpose into a number of strategic goals/objectives that are tangible, specific and different from each other?
- 4.2 Does it identify a range of strategic approaches to solve the problem?
- 4.3 Does it clearly describe the chosen approach, outlining what it will and will not do?
- 4.4 Does it highlight the risks, costs and benefits of the chosen pathway/approach (e.g. possible unintended consequences)?

Sub-element 4.1. Does it break down the purpose into a number of strategic goals/objectives that are tangible, specific and different from each other? [4 points]

This question examines whether the GDS deconstructs its purpose into measurable, separate goals. It focuses on whether the GDS identifies and isolates the various stages necessary for achieving the GDS's purpose. Points are awarded in the following way:

0 points	The GDS's purpose is not broken down, and there is no discussion of specific, separate goals.
2 points	The GDS states its goals but does not explain how these relate to the end output, and it does not provide any detail as to how they differ from one another.
4 points	The GDS states its goals and goes into specific detail as to how each of these contributes to the end output. There is supporting and differentiated detail accompanying each goal, with useful information such as time frames attached.

Sub-element 4.2. Does it identify a range of strategic options to solve the problem? [4 points]

This question examines whether the GDS has taken into account alternative strategic options which could address the problem it focuses on. Points are awarded in the following way:

0 points	The GDS makes no reference to other possible strategic options to address the problem.
2 points	The GDS makes reference to alternative strategic options in minimal detail and with no supporting evidence or examples.
4 points	The GDS makes detailed reference to alternative strategic options, with a comprehensive discussion of the opportunities and threats of implementing these other various options.

Sub-element 4.3. Does it clearly describe the chosen approach, outlining what it will and will not do? [4 points]

This question examines whether the GDS has clearly described its approach. It asks whether it has described the reasons why it chose one approach over others and if there is subsequent reference to what the GDS will not do. The Institute distinguishes between approach and strategic options; see the glossary in this working paper. Points are awarded in the following way:

0 points	The GDS does not discuss why some strategic options were chosen over others.
2 points	The GDS discusses why its strategic options were chosen, but it does not discuss why other options would not be as effective.
4 points	The GDS discusses comprehensively why it is the most effective approach. There is full consideration of other strategic options and the reasons for their rejection. It clearly describes its approach.

Sub-element 4.4. Does it highlight the risks, costs and benefits of the chosen pathway/approach (e.g. possible unintended consequences)? [4 points]

This question examines whether the GDS has taken into account the negative or unintended impacts which may arise in its focus area due to its implementation. Points are awarded in the following way:

0 points	The GDS does not discuss unintended impacts which may arise due to its implementation.
2 points	The GDS includes a brief and shallow discussion of some unintended impacts which may arise due to its implementation.
4 points	The GDS includes a full discussion of the unintended impacts which may arise due to the implementation of the GDS, and this is supported by specific details or scenarios.

Element 5: Implementation and Accountability

Who is responsible for what?

- 5.1 Does it identify who is responsible for implementing the GDS?
- 5.2 Does it identify who will report on its progress?
- 5.3 Does it explain how progress will be reported (e.g. reports and statistics) and over what time frames?
- 5.4 Does it discuss whether the GDS will undergo a final review while it is active or once it is completed?

Sub-element 5.1. Does it identify who is responsible for implementing the GDS? [4 points]

This question examines whether the GDS clearly identifies who is responsible for the GDS and therefore who is accountable for its results. Points are awarded in the following way:

0 points	The GDS does not state the name of any person as being responsible for its results.
2 points	The GDS states the name of the person/people responsible for its results but is not signed.
4 points	The GDS provides the name and the signature of the person/people responsible for the GDS, and it is clear that this person/group is accountable for its results.

Sub-element 5.2. Does it identify who will report on its progress? [4 points]

This question examines whether the GDS outlines who will report on the progress of the GDS (whether it be an individual, department, organisation, etc.). This is important in order for a reader to understand whom they may contact regarding the progress of the GDS. Points are awarded in the following way:

0 points	There is no mention in the GDS of who will report on its progress.
2 points	The GDS states who will report on its progress, but provides no further details about them or their role in relation to the GDS.
4 points	The GDS clearly outlines who will report on the GDS, providing their details and their specific role in relation to the GDS.

Sub-element 5.3. Does it explain how progress will be reported (e.g. reports and statistics) and over what time frames? [4 points]

This question examines whether the GDS discusses reporting of its progress. This is important as successful implementation of a GDS requires comprehensive progress reporting to ensure results are as intended, and if not, that there is adaptation. Points are awarded in the following way:

0 points	The GDS does not discuss how its progress will be reported.
2 points	The GDS discusses methods or time frames for reporting its progress but in limited detail.
4 points	The GDS refers comprehensively to methods and time frames for reporting its progress. Further, there is discussion of possible responses to a need for adaptation of the GDS.

Sub-element 5.4. Does it discuss whether the GDS will undergo a review once it is completed, updated or expired? [4 points]

This question examines whether the GDS has stated when and how it will be reviewed once its implementation is complete. Points are awarded in the following way:

0 points	The GDS does not refer to any arrangements for future review.
2 points	The GDS states that it will need to be reviewed, but there is no further detail as to how this will occur.
4 points	The GDS outlines in specific detail the arrangements for future review.

Element 6: Alignment and Authority

How does it align with the machinery of government?

- 6.1 Does it discuss predecessors to the strategy and identify any lessons learnt from these?
- 6.2 Does it align with its department's statement of intent?
- 6.3 Does it align with its department's annual report?

Sub-element 6.1. Does it discuss predecessors to the strategy and identify any lessons learnt from these? [4 points]

This question examines whether the GDS refers to any predecessors to the strategy. It focuses also on the GDS's discussion of lessons learnt from the success or failure of these predecessors and whether it considers these lessons in the context of its goals. Points are awarded in the following way:

0 points	The GDS makes no reference to its predecessors or the strategic context in which it is situated.
2 points	The GDS refers to its predecessors (or to the wider strategic context if it has no predecessors); however, there is no discussion of the lessons learnt from these.
4 points	The GDS refers in comprehensive detail to its predecessors (or to the wider strategic context if it has no predecessors). It discusses the lessons learnt from these in relation to its goals.

Sub-element 6.2. Does it align with its department's statement of intent? [6 points]

This question examines the extent to which the GDS aligns with its department's statement of intent. The scoring for this question illustrates whether the GDS has been referred to in its department's statement of intent explicitly, implicitly or not at all. Points are awarded in the following way:

0 points	The GDS is not referenced in its department's statement of intent.
3 points	The GDS is implicitly referenced in its department's statement of intent.
6 points	The GDS is explicitly referenced in its department's statement of intent.

If a GDS's department lacks a statement of intent, the GDS receives 0 points.

Sub-element 6.3. Does it align with its department's annual report? [6 points]

This question examines the extent to which the GDS aligns with its department's annual report. The scoring for this question illustrates whether the GDS has been referred to in its department's annual report explicitly, implicitly or not at all. Points are awarded in the following way:

0 points	The GDS is not referenced in its department's annual report.
3 points	The GDS is implicitly referenced in its department's annual report.
6 points	The GDS is explicitly referenced in its department's annual report.

If a GDS's department lacks an annual report, the GDS receives 0 points.

Note: For this analysis to remain up to date for each GDS as it remains on the GDS Index over the course of multiple years, it is necessary to re-analyse each GDS against the relevant corporate documents every time we do the analysis. This ensures we give each GDS the most up-to-date analysis possible, and involves re-analysing the alignment sub-elements 6.2 and 6.3. Each government department's most up-to-date GDS will need to be printed out, and a PDF copy saved. The search is undertaken as described above.

In addition, scoring jointly held GDSs against Element 6 means that the GDS is scored against the corporate documents of the government department it is listed under. As a result, jointly held GDSs may have different final scores.

Stage 2: Scoring GDSs using the scoring forms

In addition to the GDS scoring against the Transparency Scorecard, the scoring form (see Figure W3.2) asks the following questions to gather information on the purpose, strategic approach and strategy maps contained in the GDSs.

Purpose (the end goal):

This is taken from the GDS, and is a close paraphrase to keep it concise. The page number is also provided for referencing purposes.

Strategic approach (the means to the end goal):

The reviewer writes up their understanding of the strategic approach. The page number is also provided for referencing purposes.

Does the GDS contain a strategy map (an illustration of the strategic approach)?

The Institute considers that strategy maps could be better utilised. Our goal is to keep a record of these and benchmark progress over time. The objective is to identify an illustration that contains the objective, the actions and how they are integrated towards bringing about change. The bar for identifying whether an illustration is a strategy map is set quite low. The reviewer identifies potential strategy maps. These are then copied into a hard-copy folder, and are reviewed by other members of the team.

An output of the *2021 GDS Index* was *Working Paper 2022/06 – Strategy Maps: Copies of All Strategy Maps found in Government Department Strategies in Operation as at 31 December 2021*, documenting the strategy maps found in the *2021 GDS Index*. This working paper was not updated as part of the *2023 GDS Index*.

Figure W3.2: Scoring form

Government Department Strategy Scorecard (as at December 2023)			
Reviewer	Title of GDS: Department: GDS number:	Actual Score	Possible Score
Review date:			
1. Opportunities and Threats <i>What is the external environment?</i>			
1.1	Does it identify potential opportunities going forward?		/4
1.2	Does it identify potential threats going forward?		/4
1.3	Does it contain a clear statement describing the problem that this strategy is to solve?		/8
2. Capabilities and Resources <i>What are the internal strengths and weaknesses?</i>			
2.1	Does it identify current and future capabilities (e.g., skills, partnerships/relationships etc)?		/4
2.2	Does it identify capabilities it does not have but needs to acquire or work around?		/4
2.3	Does it identify current and future resources (e.g., financial)?		/4
2.4	Does it identify resources it does not have but needs to acquire or work around?		/4
3. Vision and Benefits (Purpose) <i>What is the purpose?</i>			
3.1	Does it provide a clear aspirational statement as to what success would like look (a desired future state)?		/8
3.2	Does it identify who the beneficiaries are and how they will benefit?		/4
3.3	Does it describe how success will be measured and over what time frame?		/4
4. Approach and Focus (Strategy) <i>What choice and trade-off have been made?</i>			
4.1	Does it divide the vision into a number of strategic goals/objectives that are tangible specific and different from one another?		/4
4.2	Does it identify a range of strategic options to solve the problem?		/4

4.3	Does it clearly describe the chosen approach, outlining what it will and will not do?		/4
4.4	Does it highlight the risks, costs, and benefits of the chosen pathway/approach (e.g. possible unintended consequences)?		/4
5. Implementation and Accountability <i>Who is responsible for what?</i>			
5.1	Does it identify who is responsible for implementing the GDS?		/4
5.2	Does it identify who will report on its progress?		/4
5.3	Does it explain how progress will be reported (e.g. reports and statistics) and over what timeframe?		/4
5.4	Does it discuss whether the GDS will undergo a review while it is active or once it is completed?		/4
6. Alignment and Authority <i>How does it align with the machinery of government?</i>			
6.1	Does it discuss predecessors to the strategy and identify any lessons learnt from these?		/4
6.2	Does it align with its department's statement of intent?		/6
6.3	Does it align with its department's annual report?		/6
TOTAL:			/96

1. What is the aspirational statement? (The end goal. This text is taken directly from the GDS documents, and condensed where necessary by the McGinness Initiative).	2. Strategic approach: Describe the selected approach/strategy in one sentence. How does the department plan to use the broader environment in which it exists (element 1) to leverage its strengths and weaknesses (element 2) so that it can provide benefits in accordance with its vision (element 3)? (The means to the end goal. This text is generated by the McGinness Initiative).	3. Does it contain a strategy map (an illustration of the strategic approach)?	4. If a public servant new to the policy area had an hour to read this GDS, would they be able to understand the approach (element 4) and the implementation and review processes (element 5)?	5. If an uninformed member of the public had 30 minutes to read this GDS, would they be able to understand the purpose (element 3), the implementation and review processes (element 5) and how this approach fits with the broader goals of government (element 6)?	6. Additional comments
---	---	--	--	--	------------------------

Worksheet 4: How to determine which sector a department belongs to

Note: The following explains how this process was undertaken so that it can be replicated by future McGuinness Institute staff.

The term ‘government departments’ comes from the Public Service Act 2020. Schedule 2, Part 1 lists all 33 departments that are currently in existence as at 22 November 2024 (see Appendix 3). As stated in Section 2.2, the Ministry for Regulation and the Social Investment Agency have not been included in the 2023 GDS Index as the dates of their establishment are after the cut-off date for this particular update. As a result, 31 departments were included in the 2023 GDS Index.

The term ‘sectors’ comes from the nine sectors mentioned within the Treasury’s annual Budget. Government departments are grouped across the nine sectors, with the exception of two. Both the Ministry of Business, Innovation and Employment’s and Ministry of Justice’s vote straddle two sectors (see Table W4.1 opposite for a list of government departments within each sector).

Table W4.1: List of sectors and their respective government departments as at 18 May 2023 Budget [9]

Note: * means the department covers two sectors

1. Economic Development and Infrastructure Sector	2. Education and Workforce Sector	3. External Sector	4. Finance and Government Administration Sector	5. Health Sector	6. Justice Sector	7. Māori Affairs Sector	8. Natural Resources Sector	9. Social Services and Community Sector
Ministry of Business, Innovation and Employment*	Ministry of Business, Innovation and Employment*	New Zealand Customs Service	Government Communications Security Bureau	Ministry of Health	Department of Corrections	Ministry of Justice*	Department of Conservation	Ministry for Culture and Heritage
Ministry of Transport	Education Review Office	Ministry of Defence	Inland Revenue Department		Crown Law Office	Ministry of Māori Development – Te Puni Kōkiri	Ministry for the Environment	Ministry of Housing and Urban Development
	Ministry of Education	Ministry of Foreign Affairs and Trade	Department of Internal Affairs		Ministry of Justice*		Land Information New Zealand	Oranga Tamariki – Ministry for Children
			New Zealand Security Intelligence Service		Serious Fraud Office		Ministry for Primary Industries	Ministry for Pacific Peoples
			Department of the Prime Minister and Cabinet					Ministry of Social Development
			Public Service Commission					Ministry for Women
			Statistics New Zealand					
			The Treasury					

Worksheet 5: How to search statements of intent and annual reports

Note: The following explains how this process was undertaken so that it can be replicated by future McGuinness Institute staff.

The process of searching for GDSs in statements of intent and annual reports is to evaluate the transparency of government departments in relation to their strategies.

Step 1

Search for the title of a GDS in its owner’s statement of intent and annual report. The Institute uses the most recently published statements of intent and annual reports. For the *2023 GDS Index*, the statements of intent varied in publication date from 2020 to 2024 and all annual reports were for the year ended 30 June 2023. First search for the full title of the GDS. If no results are found, type in key words from the GDS title. Then analyse the results using the Institute’s definitions of explicit mentions and implicit mentions of GDSs. See the Glossary on page 31. If the statement of intent or annual report has an explicit mention, a score of 6 is given; implicit mentions receive a score of 3; no mention, 0. See the 2023 Transparency Scorecard. For each explicit or implicit mention, note down the page number(s). If an explicit mention of a GDS is found, it is not necessary to search for implicit mentions.

Step 2

Repeat process for all operational GDSs.

Worksheet 6: How to create the legislation folder

Note: The following explains how this process was undertaken so that it can be replicated by future McGuinness Institute staff.

Worksheets 6 and 7 are two separate tasks but the data collected from both tasks is used together. Worksheet 6 is to see if there are any strategies required by law, whereas Worksheet 7 examines whether the strategies state if they are required by law or not.

Not all GDSs are required by legislation to be prepared, so the difference between strategies that are legally required and those that are not provides some interesting insights.

Stage 1: Generate data set

Key terms relating to legislation can be searched on the New Zealand Parliament website. From here, go to the advanced search function, and inside the content box, enter the word 'strategy'. Be sure to tick the 'apply stemming' box to ensure that related terms are also included in search results. Select all types and principal Acts in force, then click search to generate findings.

Figure W6.1: Steps required to generate accurate search results

The screenshot shows the 'Advanced search' interface on the New Zealand Parliament website. At the top, there are radio buttons for 'Acts' (checked), 'Bills', 'Secondary legislation', and 'Other Instruments'. Below this, there are input fields for 'Title', 'Content' (with 'strategy' entered), 'Year', 'Number', and 'Section number'. To the right of the 'Content' field is a dropdown menu set to 'All these words' with an example 'eg. 1998, or 1998-2001'. Below the input fields is a checked 'Apply stemming' checkbox. Under the 'Acts' section, there are two columns of checkboxes. The 'Type' column has 'All', 'Public', 'Local', 'Private', 'Provincial', and 'Imperial' all checked. The 'Status' column has 'Principal Acts in force', 'Acts not yet in force', 'Amendment Acts in force', 'As-enacted Acts', and 'Repealed Acts' all checked. At the bottom, there are 'CLEAR', 'Search help', and 'SEARCH' buttons.

Stage 2: Compose screenshot documents

All pieces of legislation that mention strategy will be listed in a table under the search results. To locate the appropriate text, select an Act and scan the document for the term 'strategy' within the document – these will be highlighted in yellow. Take a screenshot of each mention, and import all screenshots of the relevant Act into a Word document, using the 'insert pictures' function. Include the number of mentions, the location of the Act, and a screen capture of the title piece of legislation. Repeat this process for each Act that mentions 'strategy' from the search table.

Figure W6.2: Example of 'strategy' content search on the New Zealand Legislation website

Stage 3: Prepare hard copy folder

Print a colour copy of each strategy screenshot Word document and place within a hard copy folder. This stage of the process is now complete and is ready to be used for analysis.

Stage 4: Legislation analysis

Create a table collating the results of the legislation analysis, distinguishing between mandatory and voluntary legal requirements to publish a strategy. See format of table in Appendix 8.

Worksheet 7: How to search within GDSs for mentions of the term ‘Act’

Note: The following explains how this process was undertaken so that it can be replicated by future McGuinness Institute staff.

Step 1: Arrange PDFs of all operational GDSs into folders by government department (organised by publication date – in this case, using generated GDS numbers following the system GDSXX-YY, XX being the department number and YY being the given number based on publication date).

Step 2: Use the advanced search function in Adobe Acrobat, found under the edit tab in the top ribbon, to search the PDFs for the term ‘Act’. Select the options for ‘whole words only’ and ‘case sensitive’.

Step 3: Sort the PDFs by file name to retain order of publication date and review each result for the term ‘Act’ in each PDF.

Step 4: Acts that are referred to in a GDS are searched to see if they led to the development of that GDS. If so, the section and title of the Act are recorded, as well as a brief comment. If not, the next result is checked. In either case record the page numbers where the PDF uses the term ‘Act’.

Step 5: For Acts that are referred to and that led to the development of the GDS, search the Acts to see if the specific GDS is required by law. If so, the section that requires this and title of the Act are also recorded.

This information will be used in the 2023 GDS Index Handbook for each GDS (see figures W7.1 and W7.2 below).

Figure W7.1: Example of a strategy that is ‘required’ by law and is cited in the GDS

Key data	
Publication date:	April 2019
Duration:	2019–2029
Number of pages:	52
Signed by:	Crown only
This GDS replaces:	<i>National Civil Defence Emergency Management Strategy (2008)</i>
Jointly held with:	Not applicable
Transferred from:	Not applicable
Strategy map:	Yes, p. 3
Legislation:	Required (see Civil Defence Emergency Management (CDEM) Act 2002, s 31) and cited in the GDS

Figure W7.2: Example of legislation that states a department ‘may issue’ the strategy and is not cited in the GDS

Key data	
Publication date:	November 2020
Duration:	2020–2023
Number of pages:	5
Signed by:	Not signed
This GDS replaces:	Not applicable
Jointly held with:	Not applicable
Transferred from:	Not applicable
Strategy map:	Yes, pp. 1–2
Legislation:	‘May issue’ a strategy (see Education and Training Act 2020, s 5(1)) and cited in the GDS

Worksheet 8: How to update the operational GDS table on the McGuinness Institute website

Note: The following explains how this process was undertaken so that it can be replicated by future McGuinness Institute staff.

Input

Operational GDS table (exported from TablePress)
Master Excel (from researchers)

Process

Below

Outputs

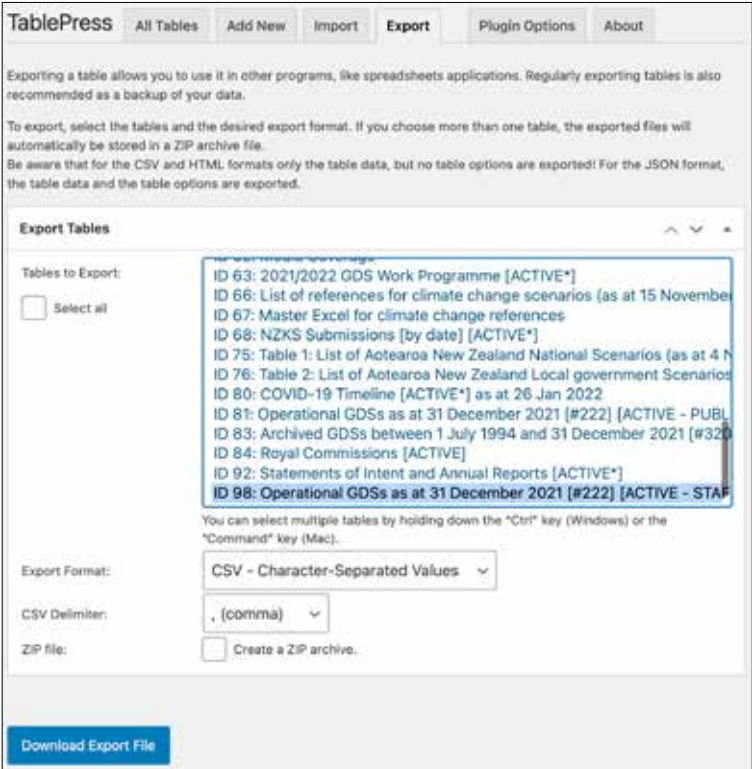

Updated TablePress table (imported back into TablePress as a CSV file)

The operational GDS table found on TablePress can be exported, updated with new data, and then imported back into TablePress. This process minimises the risk of information being carried over incorrectly from the Master Excel to the TablePress table. It also minimises the number of GDS datasets, lessening the chance of discrepancies between them.

Step 1 – Exporting the table from TablePress

1. Open the table that needs to be updated in TablePress.
2. Select the ‘export’ tab from the top menu.
3. In the list provided, select the table you are wanting to export and update (it is important to make sure you are selecting the correct table – remember to check both the table ID and title is correct before exporting or making any changes).
4. For ‘export format’, select: *CSV – Character-Separated Values*
For ‘CSV Delimiter’, select: *, (comma)*
5. Select ‘download export file’. This will download a file of the TablePress table to your local download files on your computer (this does not delete or change the table on TablePress).

Figure W8.1: Exporting a table from TablePress

Step 2 – Formatting the CSV files

- Download a copy of the most recent Master Excel to your computer and open (make sure you are working on a copy of the most recent Master Excel so that you do not accidentally edit the working copy).
- Delete any unnecessary header rows from the copy of the Master Excel so they are not carried across to the TablePress file (there should only be one header row in each file).
- In the Master Excel, select File > Save as > [file name] > File format: CSV. Close the Master Excel and open the Master Excel CSV.
- Both the TablePress file and Master Excel CSV should have the same number of rows, equalling the number of operational GDSs plus one header row (e.g. 230 rows of operational GDSs + 1 header row = 231 rows).

Step 3 – Inserting new data into the TablePress file

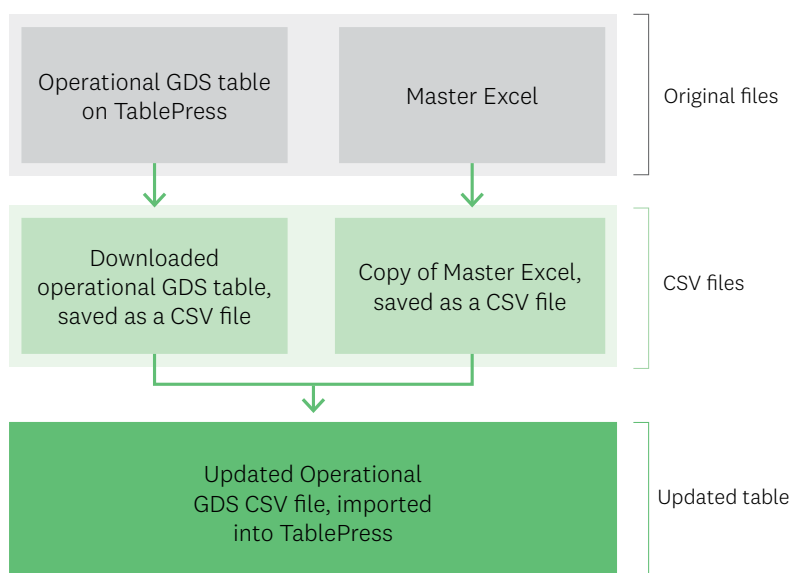

- In the Master Excel CSV, select the letter of the entire column you would like to transfer into the TablePress file and press cmd+C to copy.
- Select the letter of the column in the TablePress file that you would like to enter this data into, and paste (cmd+V).
- Check that data has been inserted into the correct column, and that the rows align correctly.
- In the TablePress file, Select File > Export to > CSV.
- In the export dialogue box, 'Include table names' should be unticked. Select 'next' and save the TablePress CSV as a new file with the date, time and version (if applicable). The original, downloaded TablePress file must be kept to archive on SharePoint.

Step 4 – Importing new table to TablePress

- Open the TablePress browser and select the 'import' tab.
- Under 'import source', select: *File upload*
Select 'choose file' and select the updated TablePress CSV that has just been saved.
Under 'import format', select: *CSV – Character-Separated Values*
Under 'add, replace or append?', select: *Replace existing table*
Select the table that is being replaced and select 'import'.
- Add 'last updated [date] [time]' in the description to keep track of when changes have been made.
- Check that the table has imported correctly and that there are the correct number of rows (which will be the number of operational GDSs + 1 header row).

As this process replaces the table, it is important that you always keep a file of the original table. These files can be kept in archive on SharePoint as a backup.

Figure W8.2: Process for updating a TablePress table

Appendix 1: GDS Index publications, 2014–2023

Appendix 1: GDS Index publications, 2014–2023

Table A1.1 below lists the publications produced by the Institute under each edition of the GDS Index. We initially planned to update the index annually. However, due to the resources required to produce the GDS Index, a decision was made in 2015 to update the GDS Index only when resources were available.

Table A1.1: GDS Index publications, 2014–2023

Title	Publication date
2014 GDS Index (GDSs as at 30 June 2014)	
<i>2014/01 – List of Government Department Strategies Between 1 July 1994 and 30 June 2014</i>	September 2014

Appendix 2: *2021 GDS Index process*

Appendix 2: 2021 GDS Index process

This appendix contains key excerpts from the *2021 GDS Index*. The definition, Scorecard and the *2021 GDS Index* process can be found in *Working Paper 2022/01 – Methodology for the 2021 Government Department Strategies Index*.

A: Definition of a GDS (2021)

The definition below was used to produce the *2021 GDS Index*. The definition of a GDS was updated in the *2023 GDS Index* (see Section 3.3).

For the purposes of the *2021 GDS Index*, ‘government department strategy’ (GDS) is defined in terms of the following criteria.

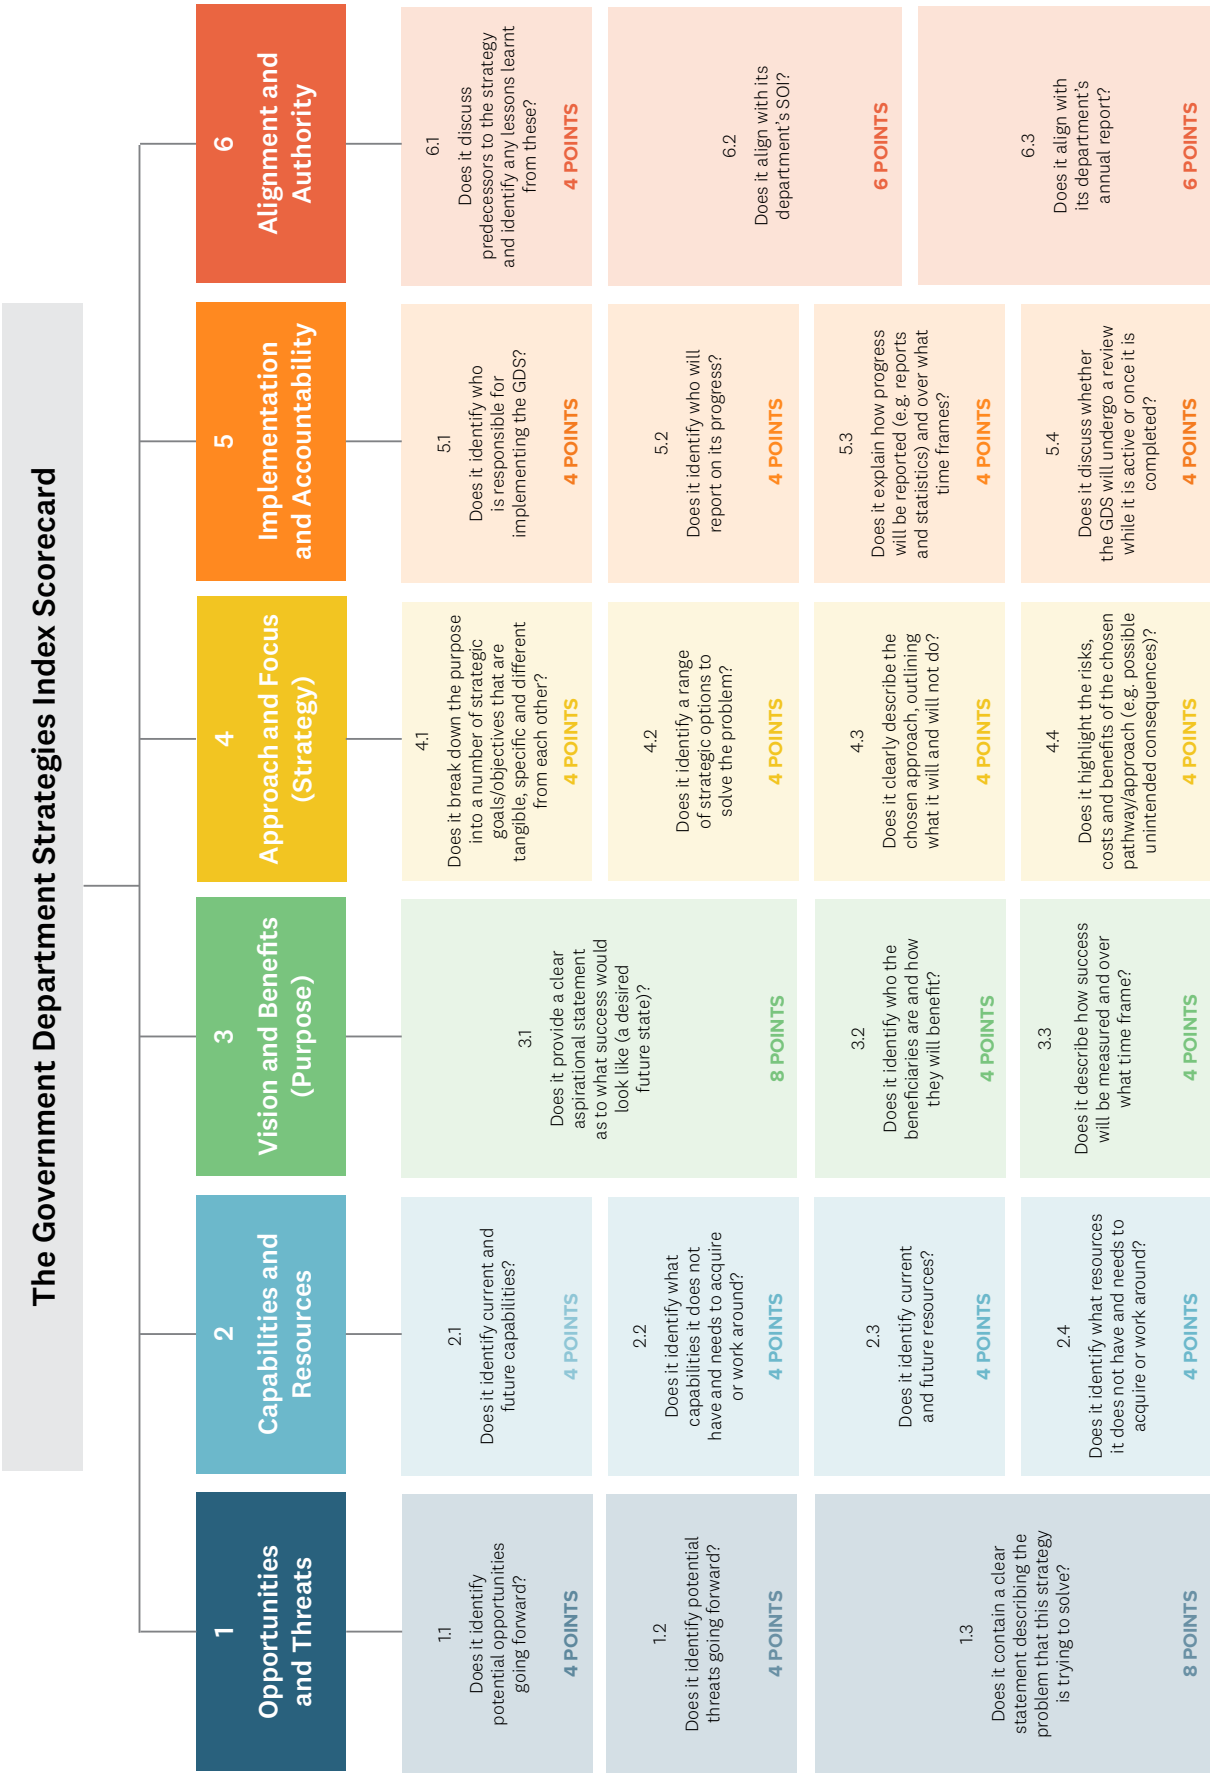

A ‘government department strategy’ must:

1. be a publicly available document accessible on a government department website
2. be public-facing, therefore excluding a strategy only made public as the result of an OIA request
3. be strategic, containing long-term thinking and setting out both the means (how) and the ends (the purpose)
4. be produced by a government department, therefore excluding situations where a strategy is written or published by another party (e.g. a Cabinet paper)
5. be national rather than local in focus, therefore excluding regional strategies
6. guide the department’s thinking and operations over two years or more, and not be a statement of intent or annual report.

B: Scorecard

Figure A2.1 overleaf shows the Scorecard that GDSs were scored against in the *2021 GDS Index*. In 2023, the Scorecard was updated and is now called the Transparency Scorecard (see Glossary).

Figure A2.1: The 2021 GDS Index Scorecard

C: Process

Figure A2.2 below shows the process undertaken to produce the 2021 GDS Index.

The differences between the 2021 process and the 2023 process are explained in Section 1.1.

Note: All references to sections and appendices in Figure A2.2 below are specific to those found within the *Working Paper 2022/01 – Methodology for the 2021 Government Department Strategies Index* and are not to be confused with the sections and appendices of this paper.

Figure A2.2: The 2021 GDS Index process

Note to Figure A2.2

All references to sections and appendices in Figure A2.2 are specific to the previous methodology in the 2021 GDS Index, see *Working Paper 2022/01 Methodology for the 2021 Government Department Strategies Index*.

Appendix 3: List of government departments [31]

Appendix 3: List of government departments [31]

Within the GDS Index, each department is assigned a number according to the order the departments appear in the legislation below. Importantly, the Ministry for Regulation and the Social Investment Agency were added to Schedule 2 of the Public Service Act 2020 in 2024. These are not included in the *2023 GDS Index*, as it was published after December 2023 and only includes the 31 departments that were active at the end of December 2023.

Table A3.1: Department numbers used in the 2023 GDS Index

Department number	Department name
1	Crown Law Office
2	Department of Conservation
3	Department of Corrections
4	Department of Internal Affairs
5	Department of Prime Minister and Cabinet
6	Education Review Office
7	Government Communications Security Bureau

Schedule 2 Part 1 Ministry for Regulation: inserted, on 1 March 2024, by clause 4 of the Public Service (Ministry for Regulation) Order 2024 (SL 2024/5).

Schedule 2 Part 1 Social Investment Agency: inserted, on 1 July 2024, by clause 4(1) of the Public Service (Social Investment Agency) Order 2024 (SL 2024/73).

Part 2

Public service agencies and joint operational agreements

Subpart 1—Public service agencies

Departments and departmental agencies

23 Establishment and reorganisations of departments and departmental agencies

- (1) The Governor-General may, by Order in Council,—
- if a department or a departmental agency is established or disestablished or if its name is changed, insert an item into, or repeal or amend an item in, Part 1 or 2 of Schedule 2;
 - if the host department, or the name of the host department, of a departmental agency is changed, amend an item in Part 2 of Schedule 2;
 - if a working arrangement referred to in section 24(2) will apply to a departmental agency (whether new or existing) or no longer applies, amend columns 3 or 4 of the table in Part 2 of Schedule 2, as appropriate.
- (2) An order relating to the establishment of a departmental agency must—
- identify the department that will be the host department of the departmental agency; and
 - if either or both of the working arrangements referred to in section 24(2) apply to the departmental agency, state which apply.
- (3) The making of an order under this section does not remove the need for a department or departmental agency established by an Act to be disestablished or have its name changed by an Act.
- (4) An order under this section is secondary legislation (*see* Part 3 of the Legislation Act 2019 for publication requirements).

Compare: 1988 No 20 s 30A

Legislation Act 2019 requirements for secondary legislation made under this section

Publication	PCO must publish it on the legislation website and notify it in the <i>Gazette</i>	LA19 s 69(1)(c)
Presentation	The Minister must present it to the House of Representatives	LA19 s 114, Sch 1 cl 32(1)(a)
Disallowance	It may be disallowed by the House of Representatives	LA19 ss 115, 116

This note is not part of the Act.

Section 23(4): inserted, on 28 October 2021, by section 3 of the Secondary Legislation Act 2021 (2021 No 7).

Relevant excerpts from the Public Service Act 2020

Section 12 of the Public Service Act 2020 sets out five public service principles, of which the fifth principle is stewardship:

- (e) to proactively promote stewardship of the public service, including of—
 - (i) its long-term capability and its people; and
 - (ii) its institutional knowledge and information; and
 - (iii) its systems and processes; and
 - (iv) its assets; and
 - (v) the legislation administered by agencies.

Section 52 sets out the general responsibilities of chief executives of departments and departmental agencies, and states:

- (1) A chief executive of a department or departmental agency is responsible to the appropriate Minister for—
 - (a) **improving ways of working across public service agencies;** and
 - (b) their agency’s responsiveness on matters relating to the collective interests of government; and
 - (c) the operation of their agency, including in carrying out the purpose of the public service under section 11; and
 - (d) supporting that Minister to act as a good steward of the public interest, including by—
 - (i) **maintaining public institutions, assets, and liabilities;** and
 - (ii) maintaining the currency of any legislation administered by their agency; and
 - (iii) **providing advice on the long-term implications of policies;** and
 - (e) the performance of the functions and duties and the exercise of the powers of the chief executive or of their agency (whether those functions, duties, or powers are imposed or conferred by an enactment or by the policies of the Government); and
 - (f) giving advice to Ministers; and
 - (g) the integrity and conduct of the employees for whom the chief executive is responsible; and
 - (h) the efficient and economical delivery of the goods or services provided by the agency and how effectively those goods or services contribute to the intended outcomes.

Appendix 4: Rejected documents [25]

Appendix 4: Rejected documents [25]

A GDS is archived when it was included in a previous GDS Index, but has since been moved to the list of ‘archived GDSs’ due to the department that is responsible for the GDS advising that it is no longer active.

In a few cases, a department will retrospectively advise the Institute of a strategy that should have been included in a previous GDS Index, but is now no longer active. In this situation, the GDS is firstly included in the current GDS Index as ‘active’, but then moved immediately to the list of ‘archived GDSs’. For this reason, it is not scored, and does not appear in the *2023 GDS Index Handbook*.

Note: A document is rejected when a department proposes a strategy document as a potential GDS, but together the Institute and the department conclude it does not meet the criteria. In the rare case there is a disagreement, the final decision is the Institute’s. See rejected documents in Tables A4.1 and A4.2.

Table A4.1: Verification process one: initial review [7]

Row	Department (number & name)/ organisation	Title of strategy	Reason for rejection*
1	03. Department of Corrections	<i>Te Aorerekura Implementation Plan: The national strategy to eliminate family violence and sexual violence</i>	This was rejected because it is an implementation plan for a strategy, and not a strategy itself. Please note that this plan is specific to the Department of Corrections.
2	04. Department of Internal Affairs	<i>Gambling Group Strategic Direction 2020–2023</i>	This does not meet criterion 4: ‘be a strategic document that contains long-term thinking (i.e. it sets out the approach (the means) and the purpose (the ends) of the strategy)’.
3	09. Land Information New Zealand	<i>Biosecurity and Biodiversity Strategy</i>	This does not meet criterion 1: ‘be a publicly available document that is published by a government department’.
4	15. Ministry of Business, Innovation and Employment	<i>Advancing New Zealand’s Energy Transition</i>	This is a document that discusses other strategies; it is not a strategy itself.
5	21. Ministry of Justice	<i>Our Strategy 2023–2027</i>	This does not meet criterion 7: ‘is not a corporate document (i.e. excludes a statement of intent, a four-year plan or an annual report)’.
6	24. Ministry of Transport	<i>Haumaru Tāngata Ki Uta Ki Tai – Volunteer Plan</i>	This does not meet criterion 6: ‘be a document that looks out at least two years or more’.
7	Tertiary Education Commission (not a department)	<i>National Careers System Strategy</i>	The Tertiary Education Commission is not a department, so it has no department number. The strategy does not meet criterion 1: ‘be a publicly available document that is published by a government department’.

Table A4.2: Verification process two: detailed review [18]

* Note: 'Reason for rejection' refers to our definition of a GDS.

Row	Department (number & name)	Title of strategy	Reason for rejection*
1	01. Crown Law Office	<i>Te Rautaki Ratonga Ā-Ture A Te Kāwanatanga – Government Legal Services Strategy 2022-2026</i>	Crown Law states: 'This is only made public as a result of an OIA, therefore not a GDS.'
2	04. Department of Internal Affairs	<i>Former Refugees, Recent Migrants and Ethnic Communities Employment Action Plan</i>	Ministry for Ethnic Communities (as part of MSD) does not consider this a strategy. Instead, it is one of seven population-based action plans that support the overarching [GDS15–15] <i>Aotearoa New Zealand Employment Strategy</i> .
3	09. Land Information New Zealand	<i>Wilding Conifer Management Strategy</i>	MPI listed this strategy as jointly held with DOC and LINZ. However, LINZ stated in a follow-up OIA that they did not hold this strategy.
4	12. Ministry for Primary Industries	<i>Deepwater Strategy</i>	This is a high level summary document and does not meet criterion 2 or criterion 4 as it not publicly accessible and does not contain strategic thinking that sets out the means (how) to the purpose or a time frame.
5	12. Ministry for Primary Industries	<i>Hector's and Maui Dolphin Threat Management Plan 2020</i>	MPI listed this strategy as jointly held with DOC. However, DOC claimed sole ownership of the strategy, so it was not considered jointly held.
6	12. Ministry for Primary Industries	<i>Hauraki Gulf Fisheries Plan</i>	This document does not meet criterion 5 as it is a regional plan.
7	13. Ministry for the Environment	<i>Gender and Ethnic Pay Gaps Action Plan</i>	This is an internally facing strategy focusing on the employees of the department.
8	13. Ministry for the Environment	<i>Sustainability Strategy</i>	This is an internally facing strategy focusing on the internal goals of the department relating to its employees; the sustainability of its practices; and its financial management.
9	15. Ministry of Business, Innovation and Employment	<i>Te Rautaki Matihiko mō Aotearoa – The Digital Strategy for Aotearoa</i>	DIA listed the strategy as not jointly held. MBIE did not include the strategy in the list of GDSs they hold and clarified in a follow-up OIA that they considered the strategy no longer active.
10	15. Ministry of Business, Innovation and Employment	<i>Former Refugees, Recent Migrants and Ethnic Communities Employment Action Plan</i>	See row 2 above.
11	18. Ministry of Foreign Affairs and Trade	<i>Trade Recovery Strategy 2.0</i>	This is a web page and was initially rejected on this basis. Going forward, we will allow web pages but they should have a date and a clear author. When preparing the next GDS Index, the Institute will ask departments to include web page strategy documents and develop a verification process for this purpose.
12	19. Ministry of Health	<i>Pharmacy Whakamahere: Understanding the pharmacy needs of our population</i>	This document does not meet criterion 4 as it does not contain strategic thinking that sets out the means (how) to the purpose.

Row	Department (number & name)	Title of strategy	Reason for rejection*
13	19. Ministry of Health	<i>Health Workforce Strategic Framework</i>	This document does not meet criterion 4 and criterion 6 as it does not contain strategic thinking that sets out the means (how) to the purpose or a time frame for long-term thinking.
14	23. Ministry of Social Development	<i>Former Refugees, Recent Migrants and Ethnic Communities Employment Action Plan</i>	See row 2 above.
15	24. Ministry of Transport	<i>Mahere Hohenga kia Whakakorea te Waro ā-Kawenga – Decarbonising Transport Action Plan</i>	MOT does not consider the Decarbonising Transport Action Plan (DTAP) to be a GDS. The DTAP acts as an implementation plan for the actions set out in the transport chapter of the first Emissions Reduction Plan [GDS13-06].
16	25. New Zealand Customs Service	<i>Inclusion and Diversity Strategy and Plan</i>	This is an internally facing strategy focusing on the employees of the department.
17	31. The Treasury	<i>He Puna Hao Pātiki: 2022 Investment Statement</i>	This is a report with advice to the government. It is not a strategy.
18	31. The Treasury	<i>Te Tai Waiora: Wellbeing in Aotearoa New Zealand 2022</i>	This is a report with advice to the government. It is not a strategy.

Table A4.3 below lists three GDSs whose titles were changed as a result of the more in-depth verification process. These are not rejects and are therefore recorded below.

Table A4.3: Verification process two: identified three GDSs with different titles in the 2023 GDS Index [3]

Row	Department (number & name)	2021 GDS Index title	2023 GDS Index title	Reason for change in title
1	17. Ministry of Education	<i>Te Rautaki Mātauranga Māori – The Māori Education Strategy</i>	<i>Ka Hikitia Ka Hāpaitia – The Māori Education Strategy</i>	The previous title has been updated to reflect what was provided in MOE’s 2024 OIA response.
2	17. Ministry of Education	<i>Te Rautaki mā te Reo Māori i roto i te Mātauranga – The Māori Language in Education Strategy</i>	<i>Tau Mai Te Reo – The Māori Language in Education Strategy</i>	The previous title has been updated to reflect what was provided in MOE’s 2024 OIA response.
3	19. Ministry of Health	<i>COVID-19: Kia Kaha, Kia Māia, Kia Ora Aotearoa – Psychological and Mental Wellbeing Plan</i>	<i>Kia Kaha, Kia Māia, Kia Ora Aotearoa – COVID-19 Psychosocial and Mental Wellbeing Recovery Plan</i>	The previous title has been updated to reflect what was provided in MOH’s 2024 OIA response.

**Appendix 5:
2021 GDSs that were
archived due to being solely
internally facing [4]**

Appendix 5: 2021 GDSs that were archived due to being solely internally facing [4]

Table A5.1 lists GDSs that were archived due to being solely internally facing. This is due to an amendment to the *2023 GDS Index* criteria – criterion 3 now states that a strategy document must be externally facing to be considered a GDS (see Section 1.1).

The Institute defines an internally facing strategy as:

A strategy document that focuses solely on the internal management and/or operations of a department (e.g. it focuses on the department’s staff diversity and inclusion policies or the sustainability practices related to how the department manages its resources).

A strategy that considers the internal management and/or operations of a department can still be counted as external if it is applying the internal information to an external source or beneficiary (e.g. how a department uses its data and technology to create better outcomes for a target group).

Each GDS in operation from the *2021 GDS Index* was reviewed to identify and remove those that were solely internally facing. GDSs that were previously operational in the *2021 GDS Index* and identified as solely internally facing were archived (see Table A5.1), while internally facing GDSs that were new to the *2023 GDS Index* were rejected (see the three listed in Table A4.2 in Appendix 4). This process ensures that going forward, the GDS Index contains only externally facing strategies.

Table A5.1: 2021 GDSs that were archived due to being solely internally facing [4]

Row	Department (number & name)	GDS title	Publication date	Sector
1	07. Government Communications Security Bureau	<i>Diversity and Inclusion Strategy 2021–2025</i>	July 2021	Finance and Government Administration Sector
2	18. Ministry of Foreign Affairs and Trade	<i>Our People Strategy</i>	July 2017	External Sector
3	18. Ministry of Foreign Affairs and Trade	<i>Diversity and Inclusion Strategy 2018–2028</i>	June 2018	External Sector
4	26. New Zealand Security Intelligence Service	<i>Diversity and Inclusion Strategy 2021–2025</i>	July 2021	Finance and Government Administration Sector

Appendix 6: Merged GDSs [22]

Appendix 6: Merged GDSs [22]

Table A6.1 lists the 73 GDSs that were reviewed to identify any GDSs that would be more fairly represented if merged with another GDS. This resulted in 12 documents being merged, effectively removing 22 GDSs, as some were jointly held.

Purpose

In some cases, a government department will publish several strategy documents that work in conjunction with one another to achieve the same outcome(s). In such cases, it is important to consider whether these documents should be merged to form one GDS, to ensure a fairer representation of strategies that are significantly inter-related.

Method

The Institute's definition of 'merged' is as follows:

When two strategy documents, or a strategy document and an implementation plan/action plan, are highly integrated with one another, they are combined into one PDF and treated and scored as a single GDS.

A search was completed for GDSs with titles that contained the following terms: 'action', 'implementation', 'plan', 'policy', 'principles' and 'roadmap'. These terms were selected as they are commonly used in documents that supplement or support an overarching document (e.g. a roadmap to achieving actions set out in another strategy document).

Where GDSs exhibited a strong inter-relatedness (e.g. connections could be found between the purpose and approach of each GDS, or one provided more detail on actions listed in another GDS), they were recorded as being merged and scored as one GDS. If inter-related GDSs were published in quick succession (e.g. within the same 12-month period), this was further reason to consider them for merging.

The GDS that gave a higher-level overview of the strategy was considered by the Institute to be the 'overarching strategy' under which any other inter-related GDSs were merged.

There were cases where even though GDSs did demonstrate some degree of inter-relatedness, they were not merged. Some examples of why are::

- they were published too far apart from one another to warrant merging
- they were so detailed that they could be read as a standalone document, or
- they related to a GDS held by a different department.

Results

See Table A6.1 opposite for specific details.

A: 2021 GDS Index changes (reduces 3 GDSs from 2023 GDS Index)

1. [GDS19–31]: *Data and Information Strategy for Health and Disability – He Rautaki Raraunga, He Rautaki Pārongo mō te Pūnaha Hauora, Whaikaha hoki* (November 2021) (merges 2 documents, which results in 1 GDS being removed from the potential list). The two merged documents are: (i) *Data and Information Strategy for Health and Disability – He Rautaki Raraunga, He Rautaki Pārongo mō te Pūnaha Hauora, Whaikaha hoki* (2021) and (ii) *Data and Information Strategy for Health and Disability: Roadmap* (2021).
2. [GDS23–06]: *Better Later Life – He Oranga Kaumātua* (November 2019) (merges 2 documents, which results in 1 GDS being removed from the potential list). The two merged documents are: (i) *Better Later Life – He Oranga Kaumātua 2019 to 2034* (2019) and (ii) *Better Later Life Action Plan – He Oranga Kaumātua: Action plan 2021–2024* (2021).
3. [GDS24–02]: *International Air Transport Policy* (May 2012) (merges 2 documents, which results in 1 GDS being removed from the potential list). The two merged documents are: (i) *International Air*

Transport Policy (August 2012) and (ii) International Air Transport Policy (May 2012).

B: 2023 GDS Index changes (reduces 19 GDSs from 2023 GDS Index)

1. [GDS04–10]: *Te Rautaki Matihiko mō Aotearoa – The Digital Strategy for Aotearoa* (September 2022) (merges 2 documents, which results in 1 GDS being removed from the potential list). The two merged documents are: (i) *Te Rautaki Matihiko mō Aotearoa – The Digital Strategy for Aotearoa* (2022) and (ii) *Action Plan for the Digital Strategy for Aotearoa* (2022).
2. [GDS11–02]: *Pacific Languages Strategy* (August 2022) (merges 2 documents, which results in 1 GDS being removed from the potential list). The two merged documents are: (i) *Pacific Languages Strategy* (2022) and (ii) *Pacific Languages Government Action Plan* (2023).
3. [GDS16–02]: *Defence Policy and Strategy Statement* (August 2023) (merges 2 documents, which results in 1 GDS being removed from the potential list). The two merged documents are: (i) *Defence Policy and Strategy Statement* (2023) and (ii) *Future Force Design Principles* (2023).
4. [GDS23–19]: *Youth Plan Voice, Leadership, Action: Strategic framework* (August 2023) (merges 3 documents, which results in 2 GDSs being removed from the potential list). The three merged documents are: (i) *Strategic Framework* (2023), (ii) *Rolling Suite of Actions* (2023) and (iii) *Measurement Framework* (2023).
5. [GDS24–07]: *Transport Evidence Base Strategy* (December 2019) (merges 2 documents, which results in 1 GDS being removed from the potential list). The two merged documents are: (i) *Transport Evidence Base Strategy* (2019) and (ii) *Te Rautaki Whai-Taunakitanga Waka a Aotearoa – Transport Evidence Base Strategy: Implementation plan* (2022).
6. [GDS27–04]: *Oranga Tamariki Action Plan* (July 2022) (merges 2 documents which results in 1 GDS being removed from the potential list). The two merged documents are: (i) *Oranga Tamariki Action Plan* (2022) and (ii) *Implementing the Oranga Tamariki Action Plan* (2022).
7. [GDS03–04], [GDS17–09], [GDS19–34], [GDS21–01], [GDS22–02], [GDS23–13], [GDS27–03] and [GDS28–02]: *Te Aorerekura – The Enduring Spirit of Affection: The national strategy to eliminate family violence and sexual violence* (December 2021) (merges 2 documents, which results in 8 GDSs being removed from the potential list). The two merged documents are: (i) *Te Aorerekura – The Enduring Spirit of Affection: The national strategy to eliminate family violence and sexual violence* (2021) and (ii) *Te Aorerekura – The Enduring Spirit of Affection: Action plan for the national strategy to eliminate family violence and sexual violence* (2021).
8. [GDS11–04] and [GDS20–06]: *Fale mo Aiga – Pacific Housing Strategy 2030* (November 2022) (merges 2 documents, which results in 2 GDSs being removed from the potential list). The two merged documents are: (i) *Fale mo Aiga – Pacific Housing Strategy 2030* (2022) and (ii) *Fale mo Aiga – Pacific Housing Action Plan 2030* (2022).
9. [GDS20–05] and [GDS22–03]: *Maihi Ka Ora – The National Māori Housing Strategy 2021-2051* (December 2021) (merges 2 documents, which results in 2 GDSs being removed from the potential list). The two merged documents are: (i) *Maihi Ka Ora – The National Māori Housing Strategy* (2021) [strategy] and (ii) *Maihi Ka Ora – The National Māori Housing Strategy* (2022) [implementation plan].

Table A6.1: Strategy documents that have ‘action’, ‘implementation’, ‘plan’, ‘policy’, ‘principles’ or ‘roadmap’ in the title

Row	Department (number & name)	GDS title/s	Merged/not merged (and if merged, the reason why)	Overarching GDS (if merged, the strategy it’s merged with)	Final 2023 GDS Index number
GDSs held by one department only (not jointly held)					
1	02. Department of Conservation	<i>Karst Management Guidelines: Policies and actions</i> (May 1999)	Not merged	N/A	GDS02–01
2	02. Department of Conservation	<i>Kiwi Recovery Plan – Mahere Whakaora Kiwi</i> (November 2018)	Not merged	N/A	GDS02–07

Row	Department (number & name)	GDS title/s	Merged/not merged (and if merged, the reason why)	Overarching GDS (if merged, the strategy it's merged with)	Final 2023 GDS Index number
3	02. Department of Conservation	<i>Climate Change Adaptation Action Plan – He Whakamahere Hātepe Urutau Mō Te Huringa Āhuarangi</i> (June 2020)	Not merged	N/A	GDS02-13
4	02. Department of Conservation	<i>Hector's and Māui Dolphin Threat Management Plan 2020</i> (December 2021)	Not merged	N/A	GDS02-18
5	03. Department of Corrections	<i>Ara Poutama Aotearoa – Suicide Prevention and Postvention Action Plan</i> (March 2022)	Not merged	N/A	GDS03-05
6	03. Department of Corrections	<i>Disability Action Plan</i> (February 2023)	Not merged	N/A	GDS03-06
7	03. Department of Corrections	<i>Ageing Well Action Plan</i> (August 2023)	Not merged	N/A	GDS03-07
8	04. Department of Internal Affairs	<i>Action Plan for the Digital Strategy for Aotearoa</i> (September 2022) [Addition to the 2023 GDS Index]	Merged The action plan was published alongside the strategy and contains actions that directly relate to the three goals identified in the strategy.	<i>Te Rautaki Matihiko mō Aotearoa – The Digital Strategy for Aotearoa</i> (September 2022)	GDS04-10
9	11. Ministry for Pacific Peoples	<i>Pacific Employment Action Plan</i> (May 2022)	Not merged	N/A	GDS11-01
10	11. Ministry for Pacific Peoples	<i>Pacific Languages Government Action Plan*</i> (June 2023) [Addition to the 2023 GDS Index]	Merged The action plan outlines how the strategy will be implemented in order to advance the key objectives and vision of the strategy.	<i>Pacific Languages Strategy</i> (August 2022)	GDS11-02 ¹
11	12. Ministry for Primary Industries	<i>National Plan of Action for the Conservation and Management of Sharks</i> (January 2014)	Not merged	N/A	GDS12-05
12	12. Ministry for Primary Industries	<i>Primary Sector Science Roadmap – Te Ao Tūroa</i> (June 2017)	Not merged	N/A	GDS12-09
13	12. Ministry for Primary Industries	<i>National Fisheries Plan for Deepwater and Middle-depth Fisheries 2019</i> (May 2019)	Not merged	N/A	GDS12-12
14	12. Ministry for Primary Industries	<i>National Fisheries Plan for Highly Migratory Species</i> (May 2019)	Not merged	N/A	GDS12-13

Row	Department (number & name)	GDS title/s	Merged/not merged (and if merged, the reason why)	Overarching GDS (if merged, the strategy it's merged with)	Final 2023 GDS Index number
15	12. Ministry for Primary Industries	<i>National Inshore Finfish Fisheries Plan</i> (October 2022)	Not merged	N/A	GDS12-21
16	13. Ministry for the Environment	<i>Te Hau Mārohi ki Anamata – Towards a Productive, Sustainable and Inclusive Economy: Aotearoa New Zealand's first emissions reduction plan</i> (May 2022)	Not merged	N/A	GDS13-06
17	13. Ministry for the Environment	<i>Updated National Implementation Plan Under the Stockholm Convention on Persistent Organic Pollutants</i> (December 2022)	Not merged	N/A	GDS13-08
18	14. Ministry for Women	<i>Te Mahere Whai Mahi Wāhine – Women's Employment Action Plan</i> (June 2022)	Not merged	N/A	GDS14-01
19	16. Ministry of Defence	<i>Defence Capability Plan 2019</i> (June 2019)	Not merged	N/A	GDS16-01
20	16. Ministry of Defence	<i>Future Force Design Principles</i> (August 2023) [Addition to the 2023 GDS Index]	Merged <i>Future Force Design Principles</i> acts as a key bridging document between the information outlined in the <i>Defence Policy and Strategy Statement</i> and the investment planning that is to be included in an upcoming <i>Defence Capability Plan</i> (not the one currently included in the 2023 GDS Index). Note: The Ministry of Defence website as at 19 November 2024 notes that work is underway on options to inform a new <i>Defence Capability Plan</i> as the next phase of the Defence Policy Review.	<i>Defence Policy and Strategy Statement</i> (August 2023)	GDS16-02 ¹
21	17. Ministry of Education	<i>Learning Support Action Plan</i> (July 2019)	Not merged	N/A	GDS17-03

Row	Department (number & name)	GDS title/s	Merged/not merged (and if merged, the reason why)	Overarching GDS (if merged, the strategy it's merged with)	Final 2023 GDS Index number
22	17. Ministry of Education	<i>Action Plan for Pacific Education: 2023 Refresh</i> (July 2023)	Not merged	N/A	GDS17-15
23	18. Ministry of Foreign Affairs and Trade	<i>International Cooperation for Effective Sustainable Development (ICESD) [Policy Statement]</i> (November 2019)	Not merged	N/A	GDS18-01
24	18. Ministry of Foreign Affairs and Trade	<i>Gender Action Plan</i> (January 2021)	Not merged	N/A	GDS18-03
25	18. Ministry of Foreign Affairs and Trade	<i>Child & Youth Well-Being Strategic Action Plan</i> (May 2021)	Not merged	N/A	GDS18-04
26	18. Ministry of Foreign Affairs and Trade	<i>Human Rights Strategic Action Plan for International Development Cooperation</i> (October 2021)	Not merged	N/A	GDS18-05
27	19. Ministry of Health	<i>National Plan for Child Cancer Services in New Zealand</i> (December 2011)	Not merged	N/A	GDS19-06
28	19. Ministry of Health	<i>Cancer Plan 2015-2018</i> (December 2014)	Not merged	N/A	GDS19-09
29	19. Ministry of Health	<i>Faiva Ora 2016-2021 – National Pasifika Disability Plan</i> (August 2017)	Not merged	N/A	GDS19-16
30	19. Ministry of Health	<i>Influenza Pandemic Plan: A framework for action</i> (August 2017)	Not merged	N/A	GDS19-17
31	19. Ministry of Health	<i>Whāia Te Ao Mārama 2018 to 2022 – The Māori Disability Action Plan</i> (March 2018)	Not merged	N/A	GDS19-18
32	19. Ministry of Health	<i>Mental Health and Addiction Workforce Action Plan</i> (April 2018)	Not merged	N/A	GDS19-20
33	19. Ministry of Health	<i>National Poliomyelitis Response Plan for New Zealand</i> (February 2019)	Not merged	N/A	GDS19-21
34	19. Ministry of Health	<i>National Syphilis Action Plan</i> (June 2019)	Not merged	N/A	GDS19-22
35	19. Ministry of Health	<i>COVID-19 Health and Disability System Response Plan</i> (April 2020)	Not merged	N/A	GDS19-25
36	19. Ministry of Health	<i>Ola Manuia – Pacific Health and Wellbeing Action Plan</i> (June 2020)	Not merged	N/A	GDS19-26

Row	Department (number & name)	GDS title/s	Merged/not merged (and if merged, the reason why)	Overarching GDS (if merged, the strategy it's merged with)	Final 2023 GDS Index number
37	19. Ministry of Health	<i>Whakamaaua – Māori Health Action Plan</i> (July 2020)	Not merged	N/A	GDS19-27
38	19. Ministry of Health	<i>Kaiāwhina Workforce Action Plan</i> (November 2020)	Not merged	N/A	GDS19-28
39	19. Ministry of Health	<i>Kia Kaha, Kia Māia, Kia Ora Aotearoa: COVID-19 Psychosocial and Mental Wellbeing Recovery Plan</i> (December 2020)	Not merged	N/A	GDS19-29
40	19. Ministry of Health	<i>Data and Information Strategy for Health and Disability: Roadmap 2021–2024</i> (November 2021) [From 2021 GDS Index]	Merged The action plan was published alongside the strategy and contains actions that directly relate to the five focus areas identified in the strategy.	<i>Data and Information Strategy for Health and Disability – He Rautaki Raraunga, He Rautaki Pārongo mō te Pūnaha Hauora, Whaikaha hoki</i> (November 2021)	GDS19-31 ¹
41	19. Ministry of Health	<i>COVID-19 Māori Health Protection Plan</i> (December 2021)	Not merged	N/A	GDS19-32
42	19. Ministry of Health	<i>Smokefree Aotearoa 2025 Action Plan</i> (December 2021)	Not merged	N/A	GDS19-33
43	19. Ministry of Health	<i>National HIV Action Plan</i> (March 2023)	Not merged	N/A	GDS19-36
44	20. Ministry of Housing and Urban Development	<i>Homelessness Action Plan</i> (February 2020)	Not merged	N/A	GDS20-02
45	20. Ministry of Housing and Urban Development	<i>Public Housing Plan 2021–2024</i> (January 2021)	Not merged	N/A	GDS20-03
46	20. Ministry of Housing and Urban Development	<i>Te Tauākī Kaupapa Here a te Kāwanatanga mō te Whakawhanake Whare, Tāone anō hoki – Government Policy Statement on Housing and Urban Development</i> (September 2021)	Not merged	N/A	GDS20-04
47	23. Ministry of Social Development	<i>Te Pae Tata Māori Strategy and Action Plan</i> (June 2019)	Not merged	N/A	GDS23-03

Row	Department (number & name)	GDS title/s	Merged/not merged (and if merged, the reason why)	Overarching GDS (if merged, the strategy it's merged with)	Final 2023 GDS Index number
47	23. Ministry of Social Development	<i>Disability Action Plan 2019–2023</i> (November 2019)	Not merged Note: This document could not be merged with the <i>Disability Strategy 2016–2026</i> as the latter is jointly held by MOH and MSD, whereas the former is only held by MSD.	N/A	GDS23–07
48	23. Ministry of Social Development	<i>Campaign for Action on Family Violence: Framework for change</i> (June 2020)	Not merged	N/A	GDS23–08
49	23. Ministry of Social Development	<i>Better Later Life Action Plan – He Oranga Kaumātua: Action plan 2021–2024</i> (September 2021) [From 2021 GDS Index]	Merged The action plan outlines the actions that will be taken to support the strategy from 2021 to 2024 and is underpinned by the guiding principles of the strategy. As well as developing 25 new actions, the 10 initial actions identified in the strategy are carried forward.	<i>Better Later Life – He Oranga Kaumātua</i> (November 2019)	GDS23–06
50	23. Ministry of Social Development	<i>Working Matters: An action plan to ensure disabled people and people with health conditions have an equal opportunity to access employment</i> (July 2020)	Not merged	N/A	GDS23–12
51	23. Ministry of Social Development	<i>Older Workers Employment Action Plan – He Mahere Mahi Whakawhiwhi Mahi mō te Hunga Pakeke</i> (April 2022)	Not merged	N/A	GDS23–16

Row	Department (number & name)	GDS title/s	Merged/not merged (and if merged, the reason why)	Overarching GDS (if merged, the strategy it's merged with)	Final 2023 GDS Index number
52	23. Ministry of Social Development	<i>Youth Plan Voice, Leadership, Action: Rolling suite of actions</i> (August 2023) <i>Youth Plan Voice, Leadership, Action: Youth plan measurement framework</i> (August 2023) [Addition to the 2023 GDS Index]	Merged The action plan and the measurement framework were published alongside the strategy. The action plan sets out actions that directly relate to the two identified focus areas that underpin the vision of the strategy. The measurement framework provides monitoring and assessment of how the action plan contributes to the key outcomes of the strategy.	<i>Youth Plan Voice, Leadership, Action: Strategic framework</i> (August 2023)	GDS23-19 ¹
53	24. Ministry of Transport	<i>National Airspace Policy of New Zealand</i> (April 2012)	Not merged	N/A	GDS24-01
54	24. Ministry of Transport	<i>International Air Transport Policy</i> (August 2012) [From 2021 GDS Index]	Merged Both strategies have the same name and were published in the same year. The strategy that was published in May appears to be the main strategy document, whereas the strategy published in August appears to be less comprehensive but contains some overlapping content.	<i>International Air Transport Policy</i> (May 2012) ²	GDS24-02 ¹
55	24. Ministry of Transport	<i>Te Rautaki Whai-Taunakitanga Waka a Aotearoa – Transport Evidence Base Strategy Implementation Plan</i> (October 2022) [Addition to the 2023 GDS Index]	Merged The action plan outlines a work programme to implement the high-priority initiatives that are identified in the strategy and sets out the actions that need to be taken to achieve the strategy's vision.	<i>Transport Evidence Base Strategy</i> (December 2019)	GDS24-07 ¹

Row	Department (number & name)	GDS title/s	Merged/not merged (and if merged, the reason why)	Overarching GDS (if merged, the strategy it's merged with)	Final 2023 GDS Index number
56	24. Ministry of Transport	<i>Government Policy Statement on Land Transport 2021/22–2030/31</i> (September 2020)	Not merged	N/A	GDS24–08
57	24. Ministry of Transport	<i>Rail Plan</i> (April 2021)	Not merged	N/A	GDS24–10
58	24. Ministry of Transport	<i>Search and Rescue Strategic Plan</i> (NK)	Not merged	N/A	GDS24–13
59	27. Oranga Tamariki – Ministry for Children	<i>Children's Action Plan</i> (October 2012)	Not merged	N/A	GDS27–01
60	27. Oranga Tamariki – Ministry for Children	<i>Future Direction Action Plan</i> (September 2021)	Not merged	N/A	GDS27–02
61	27. Oranga Tamariki – Ministry for Children	<i>Implementing the Oranga Tamariki Action Plan</i> (July 2022) [Addition to the 2023 GDS Index]	Merged The implementation plan was published alongside the strategy and contains actions that directly relate to the six outcomes identified in the strategy.	<i>Oranga Tamariki Action Plan</i> (July 2022)	GDS27–04 ¹
62	28. Public Service Commission	<i>Kia Toipoto – Public Service Action Plan</i> (November 2021)	Not merged	N/A	GDS28–01
63	28. Public Service Commission	<i>Fourth National Action Plan – Te Tuawhā o ngā Mahere Mahi ā-Motu</i> (December 2022)	Not merged	N/A	GDS28–03
64	30. Statistics New Zealand	<i>Government Data Strategy and Roadmap</i> (August 2021)	Not merged	N/A	GDS30–02
65	31. The Treasury	<i>Thirty Year New Zealand Infrastructure Plan</i> (August 2015)	Not merged	N/A	GDS31–01

73	23. Ministry of Social Development and 27. Oranga Tamariki – Ministry for Children	<i>Social Sector Commissioning 2022-2028 Action Plan</i> (October 2022)	Not merged	N/A	GDS23-18 and GDS27-05

Notes to Table A6.1.

1. This table was generated using searches of strategy document titles. Key search terms included: 'action', 'implementation', 'plan', 'policy', 'principles' and 'roadmap'.
2. In this instance, the GDS numbers apply to the overarching GDS, as the strategy documents in which the terms were found have been merged to form the overarching GDS and therefore are no longer considered to be standalone GDSs, but components of one.
3. This was an unusual situation where two documents were published in the same year under the same title. The Institute decided to use the most recently published iteration as the primary document. For the purposes of the GDS Index, both documents were combined into one PDF.

Appendix 7: Jointly held GDSs [37]

Appendix 7: Jointly held GDSs [37]

Table A7.1 lists GDSs that are jointly held by two or more departments. Jointly held GDSs are listed under each department that holds them, so a GDS that is jointly held by four departments will appear in the GDS Index four times as four separate GDSs. This is to illustrate each department's ownership of the strategy and responsibility for its implementation.

The decision to treat a GDS as jointly held is made through OIA correspondence with the relevant departments. A department will typically inform the Institute that another department has a role to play in a certain part of a GDS, or the GDS as a whole. The Institute will then confirm this with the department that was mentioned before recognising the strategy as jointly held.

In certain cases, a department may disagree and state that they do not hold the strategy. In this case, the Institute will accept a commitment from the department concerned that it is no longer responsible or accountable for the strategy. Obtaining clarity over which department holds each GDS has been difficult and very time-consuming.

Table A8.2: Key data (legislation): Two GDSs from the 2021 GDS Index are no longer mentioned in legislation

Row	GDS number	Department (number & name)	GDS title	Publication date	Previous legislation		Reason no longer mentioned in legislation
					Act title and section	Cited or not cited in the GDS	
1	GDS19-13	19: Ministry of Health	<i>Disability Strategy 2016–2026</i>	November 2016	New Zealand Public Health and Disability Act 2000, s 8(2)	Cited	New Zealand Public Health and Disability Act 2000 was repealed on 1 July 2022 and replaced by Pae Ora (Healthy Futures) Act 2022. However, the Healthy Futures Act does not mention the Disability Strategy. Therefore, this Disability Strategy is no longer mentioned in legislation.
2	GDS23-01	23: Ministry of Social Development	<i>Disability Strategy 2016–2026</i>	November 2016	New Zealand Public Health and Disability Act 2000, s 8(2)	Cited	As GDS19-13 above

**Appendix 9:
GDSs archived between
October 1994 and 31
December 2023 [406]**

Appendix 9: GDSs archived between October 1994 and 31 December 2023 [406]

Table A9.1 below lists all archived GDSs. This includes:

- (i) 4 GDSs from the *2021 GDS Index* (solely internally facing)
- (ii) 1 GDS from the *2021 GDS Index* (no longer jointly held)
- (iii) 1 GDS from the *2021 GDS Index* (no longer met the criteria)
- (iv) 4 GDSs from the additions to the *2023 GDS Index* that MBIE advised were no longer in operation. These are identified with an asterisk.
- (iv) 69 GDSs from the *2021 GDS Index* that departments advised were no longer in operation.

During the OIA process, departments inform the Institute whether any GDSs have been archived since the previous GDS Index. GDSs will typically be archived due to being replaced by a new GDS, or having simply run their course (no longer in operation).

Occasionally a department fails to inform the Institute of an operational GDS until after the GDS has expired. In these situations the GDS is treated as both accepted and archived in the same GDS Index. This situation is recorded in the column titled ‘Reason archived’ as ‘Accepted and archived’.

Due to the tightening of the criteria for a strategy document to be considered a GDS in the *2023 GDS Index*, any strategy documents that were previously accepted as a GDS in the *2021 GDS Index* but do not meet the updated criteria have been archived. This situation is recorded in the column titled ‘Reason archived’ as ‘Archived as found to no longer meet the criteria’.

Table A9.1: GDSs archived between October 1994 and 31 December 2023 [406]

Row	Department that archived the GDS	GDS title	Publication date

**Appendix 10:
GDSs in operation in
the *2023 GDS Index* by
department [230]**

Appendix 10: GDSs in operation in the 2023 GDS Index by department [230]

Table A10.1 below lists all the GDSs that make up the 2023 GDS Index. The list of GDSs in operation ranked by the Transparency Scorecard can be found in the 2023 GDS Index Handbook.

The sector column refers to the groupings used in *The Estimates of Appropriations for the Government of New Zealand for the Year Ending 30 June 2023*. The final column states when a GDS was first added to a GDS Index. Both of these columns are analysed further in the 2023 GDS Index Handbook.

Table A10.1: All GDSs in operation in the 2023 GDS Index [230]

Row	Department (number & name)	GDS number	GDS title	Publication date	Sector	GDS Index when GDS was added

- 2 In 2011, the Institute hosted StrategyNZ (see McGuinness Institute. (n.d.). StrategyNZ. Retrieved 4 August 2022 from www.mcguinnessinstitute.org/policy-projects/strategy-nz). This event brought together over 100 people from throughout the country, with the aim of exploring an overarching strategy for New Zealand. The idea that most resonated with participants was Sir Paul Callaghan’s vision of making New Zealand ‘a place where talent wants to live’. This thinking led to our StrategyNZ project and our TalentNZ initiative. For more information about TalentNZ, see McGuinness Institute. (n.d.). TalentNZ. Retrieved 4 August 2022 from www.mcguinnessinstitute.org/research-projects/talent-nz

- 4 Previously seven key regulatory departments were required to publish ‘regulatory stewardship documents’ to meet the government’s expectation that departments ‘maintain and publish up-to-date information about their regulatory decision-making processes, including timelines and the information or principles that inform their regulatory decisions’. This requirement was established when Treasury was initially overseeing the management of the Regulatory Management System (RMS). See The Treasury. (21 April 2017). Government Expectations for Good Regulatory Practice, p. 4. Retrieved 9 January 2025 from www.treasury.govt.nz/publications/guide/government-expectations-good-regulatory-practice

New Zealand’s Regulatory Management System (RMS) is the set of policies, institutions, processes and tools used by central government to pursue and maintain good quality regulation. Previously, Treasury had responsibility for New Zealand’s RMS. The responsibility for the RMS has recently been transferred to the Ministry for Regulation.

Key components of the RMS are generally set by Cabinet. Government Expectations for Good Regulatory Practice (2017), published by Treasury, sets out general guidance on the features of a good regulatory system, and explain what agencies should be doing to meet their regulatory stewardship obligations. There are a few components set out in law: the Public Service Act (which specifies that chief executives have responsibility for stewarding the legislation their agencies administer), the Legislation Act (which provides for the role and responsibilities of the Parliamentary Counsel Office (PCO)) and a growing range of international agreements, or treaties, that include obligations for good regulatory practices or regulatory transparency.

See Ministry for Regulation. (13 December 2024). The Regulatory Management System. Retrieved 22 December 2024 from www.regulation.govt.nz/our-work/the-regulatory-management-system

The Ministry for Regulation keeps a record of all regulatory impact analysis (RIA). The level of analysis is in proportion to the significance of the change, and in some cases an exemption may apply. If a regulatory proposal is taken to Cabinet, the accompanying Regulatory Impact Statement (RIS) is also published on the ministry’s website. A RIS summarises, based on the findings of the agency’s regulatory impact analysis, an agency’s best advice on a regulatory proposal to both its Minister and Cabinet.

See Ministry for Regulation. (13 December 2024). Regulatory Impact Analysis (RIA). Retrieved 22 December 2024 from www.regulation.govt.nz/our-work/the-regulatory-management-system

The ministry also undertakes its own reviews and prepares public reports on areas that it considers, or its Minister considers, would be useful for ensuring that good quality regulation is maintained.

See Ministry for Regulation. (13 December 2024). About regulatory reviews. Retrieved 22 December 2024 from www.regulation.govt.nz/our-work/the-regulatory-management-system

Note: Treasury has a website page that explains the history and lists the departments previously required to publish regulatory stewardship documents. See The Treasury. (18 May 2020). Regulatory System Reporting. Retrieved 4 August 2022 from www.treasury.govt.nz/information-and-services/regulation/regulatory-stewardship/keeping-regulation-fit-purpose/regulatory-system-reporting

Note: The Government Expectations for Good Regulatory Practice (2017) notes that it succeeds and replaces previous government statements of regulatory expectations including: the 1997 Code of Good Regulatory Practice, the 2009 Government Statement on Regulation, and the 2013 Initial Expectations for Regulatory Stewardship. See The Treasury. (21 April 2017). Government Expectations for Good Regulatory Practice, p. 1. - 9 'In September 2019, Cabinet considered public finance system modernisation and strategic planning. It agreed to stop requirements for Four Year Plans, and noted Ministers should have certain expectations for all agency strategic planning and reporting processes.' See The Treasury. (22 December 2020). Strategic thinking and planning. Retrieved 5 November 2024 from www.treasury.govt.nz/information-and-services/state-sector-leadership/guidance/strategic-thinking-and-planning

10 The goals and objectives of government are confusing. In addition to ‘Government targets’, there are a range of other terms used to indicate the direction of public policy. Key terms in the Public Finance Act 1989 alone include:

1. long-term objectives
2. short-term intentions
3. strategic objectives
4. strategic intentions
5. wellbeing objectives

Other terms used in the *2024 Budget* include:

6. overarching goals (in 2024, there are three)
7. (Government) priorities (in 2024, there are five).

See The Treasury. (27 March 2024). *Budget Policy Statement*, pp. 1–2. Retrieved 5 January 2024 from www.treasury.govt.nz/publications/budget-policy-statement/budget-policy-statement-2024#budget-policy-statement

11 The DPMC website states: ‘Government Targets will focus attention, resources and accountability on improving service outcomes. The Targets are intentionally ambitious to ensure New Zealanders get better results and the public services they deserve in health, education, law and order, work, housing and environment. Ministers and agency chief executives are accountable for delivery, and the Government expects the public service to dig deeply into root causes, to be innovative, and to be disciplined in directing resources to where they will have the greatest impact on outcomes.’ See Department of the Prime Minister and Cabinet (DPMC). (n.d.). Government Targets. Retrieved 20 December 2024 from <https://www.dPMC.govt.nz/our-programmes/government-targets>.
