Long-Term Planning		
Working towards a sustainable future	sustainable	future.info

A: Background

Sustainable Future Institute
Is an independent think tank specialising in research and policy analysis.

Project 2058

The strategic aim is to promote integrated long-term thinking, leadership and capacity-building so that New Zealand can effectively explore and manage risks and opportunities over the next 50 years. The method to achieve this aim is to produce a National Sustainable Development Strategy.

Presentation

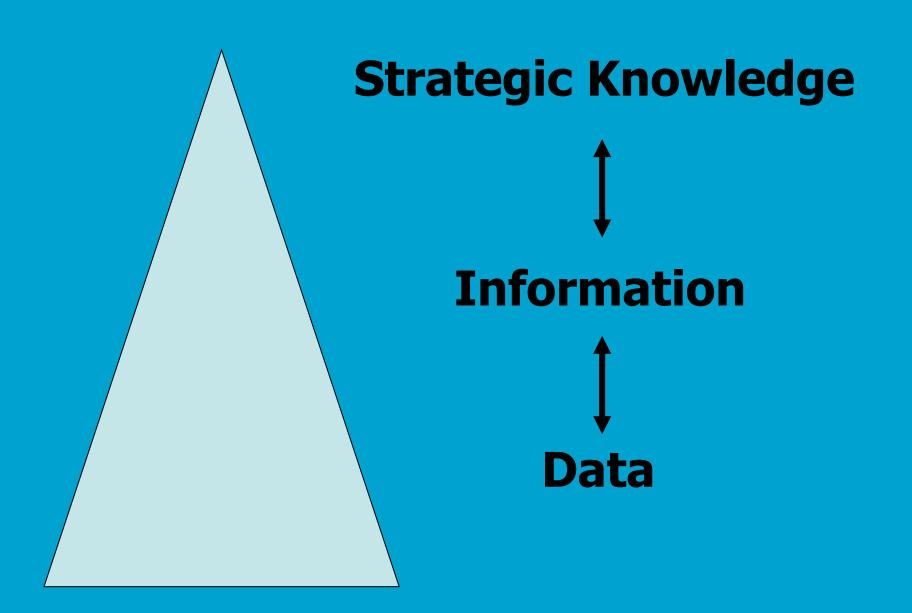

Part A: Background

Part B: The Big Picture

Part C: 21 Drivers of Change

Part D: Scenarios

The Law of Large Numbers

a thousand in a pinch

a million in a cup

a billion in a bathtub

a trillion in a classroom

in 10 football fields, covered 6 feet deep

Futures Studies — The Theory

A: Hindsight, Insight and Foresight

B: Probable future

Forecasting and sometimes prediction (Status Quo)

Possible futures

Scenarios, risks (Explorative)

Preferred futures

Strategies for change, propelled by innovation and leadership (Visionary)

C: Four Steps

- 1. Define parameters, trends, drivers, assumptions
- 2. Explore uncertainties and rank
- 3. Build scenario worlds, write stories, test
- 4. Use, consider implications, review, communicate

Walking Backwards into the Future

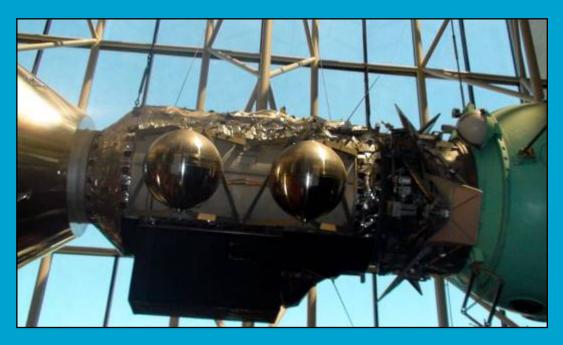

Many Pakeha detractors have said that the Maori dwell too much on the past. They would probably be right from a Pakeha perspective.

The Maori response would probably be that Pakeha do not spend enough time thinking about and learning from their own past. This is why we're in the mess we are today.

Justice Joe Williams, 1990

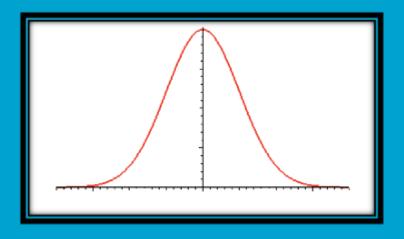

Innovation / Invention

The Extremes Inform the Middle

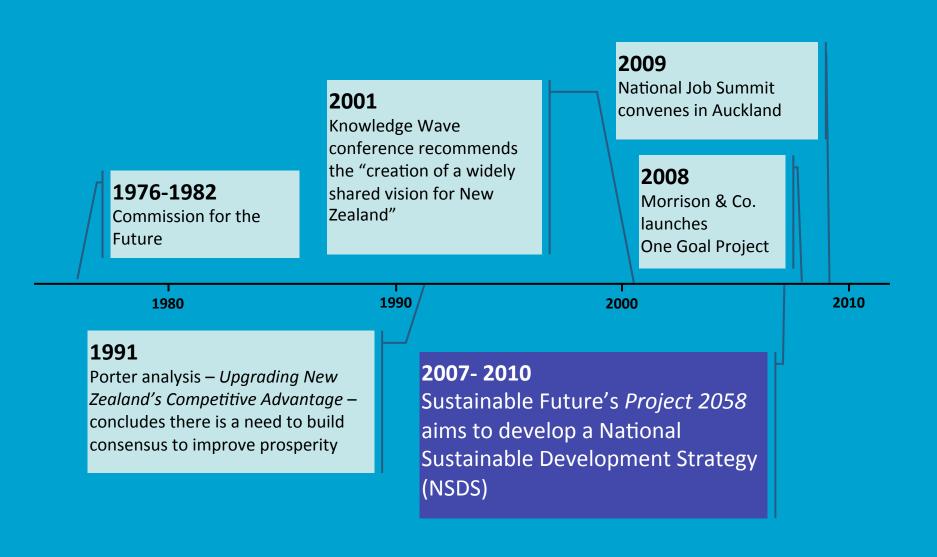

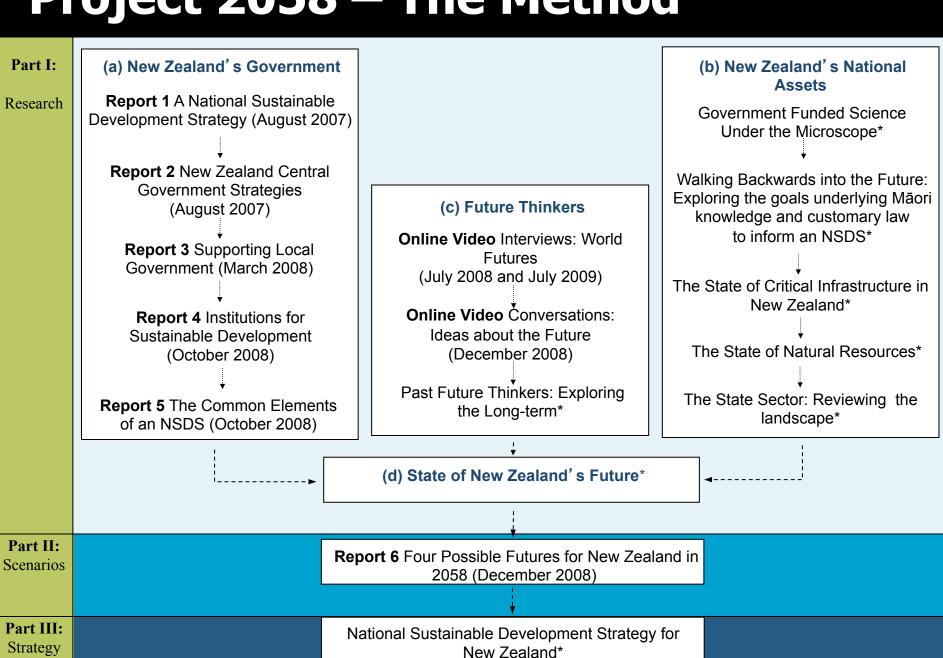

Initiatives to progress long-term thinking in New Zealand

Project 2058 – The Method

B: The Big Picture

- Of the 97 billion who have lived 90 billion have died
- Of the 7 billion alive 3 billion currently live on \$2 or less a day
- Of the 4 billion living on more than \$2 2 billion are financially and physically dependent
- So we represent the 2 billion earning, alive and able to make a difference
 - (2 billion divided into 97 we are the 2%)

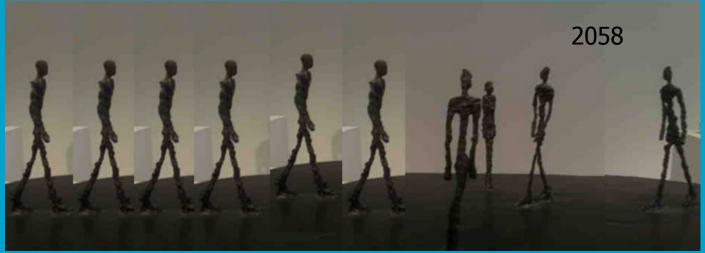

From 40:60 to 60:40

In 2008, 3 billion made \$2 or less per day.

Fifty years later, the developed countries & China grow old – while Africa & India remain

young.

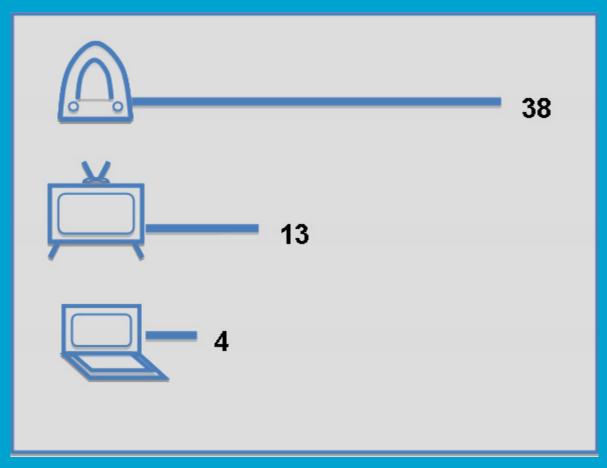

Ants: One single global mega-colony

- Equal to biomass of humans
- Ants from European, Californian and Japan rub antennae with one another and never became aggressive or try to avoid one another. In short, they act as if they all **belong** to the same colony, despite living on different continents separated by vast oceans.
- 'They are so much like human beings as to be an embarrassment. They farm fungi, raise aphids as livestock, launch armies for wars, use chemical sprays to alarm and confuse enemies, capture slaves...They exchange information ceaselessly. They do everything but watch television' – Lewis Thomas

Communication

Years it took to reach a market audience of 50 million

C: 21 Global Drivers of Change

Primary Change Agents

- 1. Climate change
- 2. Population and demographics
- 3. Ecosystems and biodiversity
- 4. Energy
- 5. Resources
- 6. Values and beliefs
- 7. Justice and freedom

\longleftrightarrow

Global Drivers of Change

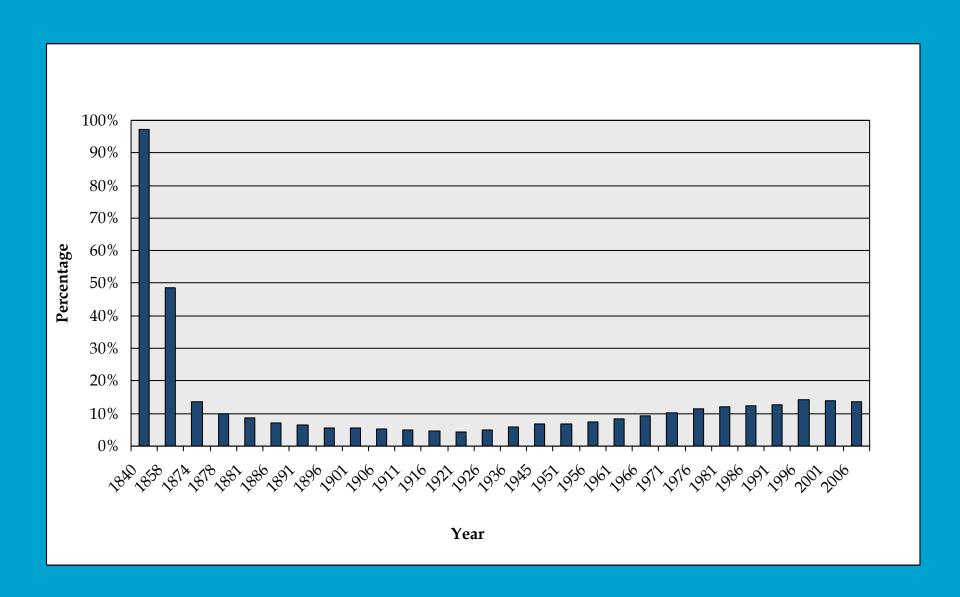

Secondary Change Agents

- 8. Political systems and institutions
- 9. Economic models
- 10. Management of ecosystems and resources
- 11. Infrastructure
- 12. Security and conflict
- 13. Technology
- 14. Information, learning and ideas

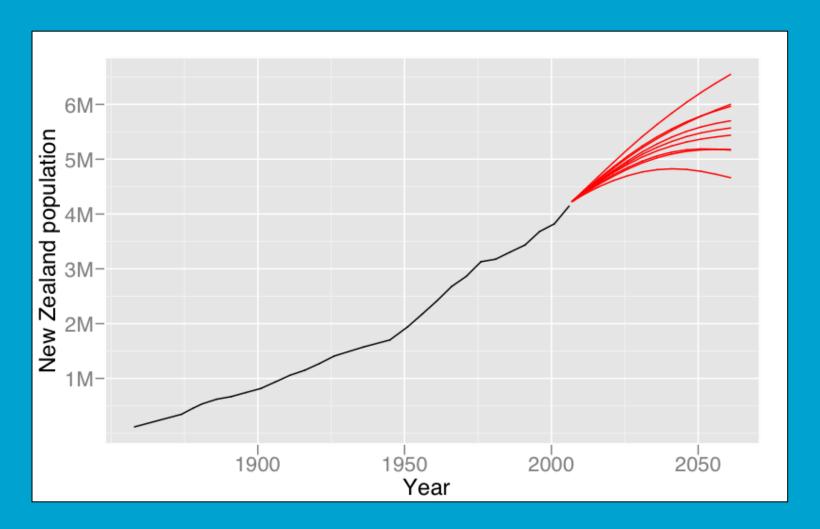

Wild Cards

- 15. Pandemic
- 16. Tsunami
- 17. Drought
- **18. Volcanoes and earthquakes**
- 19. Astronomical events
- 20. Extreme weather
- 21. Terrorism, Biological and chemical warfare

Population

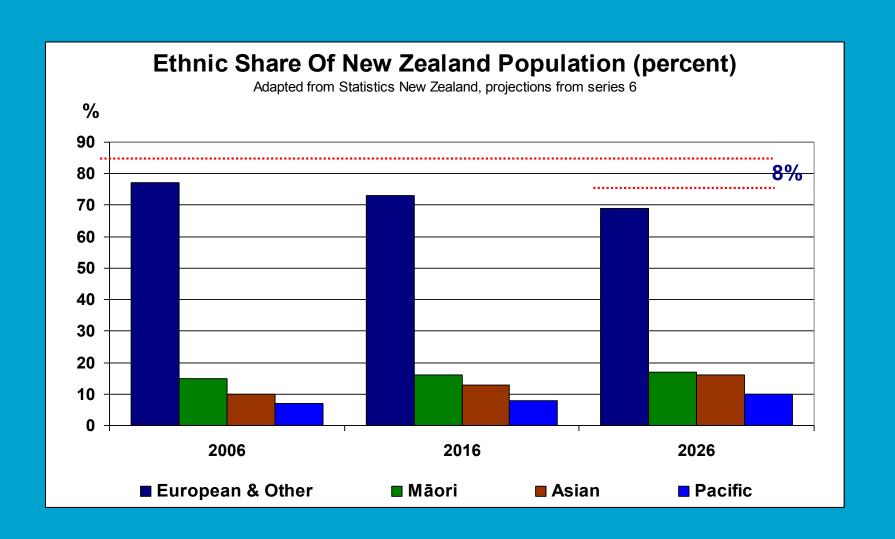

Population

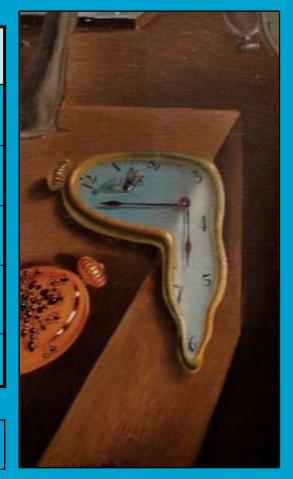

New Zealand has one of the highest rates of combined immigration and emigration (population turnover) in the world.

Race Relations

Years of Life

	Male	Female
1876	50 years	54 years
1908	61 years	68 years
1955-57	68 years	73 years
2005-07	77 years	82 years
2055-57	?	?

Benchmarking

UN Human Development Report 2007/2008 and 2008 Update

Total Human Development Index	Includes Education Index	Includes Disparity of income (ratio of richest 10% to poorest 10%)	Includes RST expenditure (% GDP)	Includes GDP (per capita)
1. Iceland (0.968)	1= Australia (0.993)	1. Japan (4.5)	1. Israel (4.46)	1. Luxembourg (60 228)
3. Australia (0.962)	1= New Zealand (0.993)	42. Ireland (9.4)	20. Australia (1.70)	16. Australia (31 794)
19. Italy (0.945)	6. Norway (0.991)	64. Macedonia (1.25)	25. Russia (1.17)	27. UAE (25 514)
20. New Zealand (0.944)	12. Ireland (0.978)	65. New Zealand (12.5)	26. New Zealand (1.16)	28. New Zealand (24 996)
21. UK (0.942)	18. UK (0.970)	66. Australia (12.5)	27. Ukraine (1.16)	29. Greece (23 381)
177. Sierra Leone (0.336)	177. Burkina Faso (0.255)	126. Bolivia (168.1)	91. Peru (0.10)	174. Malawi (667)

D: Scenarios

The Team

Well NZ ower to 2: An island paradise but back to the Jung People World Well Poor : Missed the 4: All Over Global Bus Rover Poor

Indicators

Responses of *Powerful* counties

- Self-sufficient, heavily armed and a fortress mentality
- Serious engagement with all the problems of the planet

Responses of Small counties

- Disrupt
- Ignore
- Adapt / Innovate
 - Monitor closely what is happening
 - Support global leadership (UN, WB, etc)
 - Build alliances (e.g. State of Australia, Pacific Union)
- Leadership lead by example

Small countries like New Zealand might have a limited ability to influence world events...

...but we can still shape the future.

New Zealand will never be the puppeteer...

...but we can be part of the audience, and that means we can decide to give a standing ovation or boo the performance.

We can show global players how changes should be made – not because they have to listen to us...

...but because small countries have put in place something that powerful countries want.

not because we have to, but because we want what it can deliver
