For the purposes of this index, the list of the 136 government department strategies (GDSs) is a list of all GDSs in operation as at 30 June 2014.

The methodology of how this list was collected is contained in Working Paper 2014/02: Analysis of Government Department Strategies Between 1 July 1994 and 30 June 2014—An overview.

For more information about each element and sub-element of the GDS scorecard, please refer to Working Paper 2015/04: Methodology for the Government Department Strategies Index New Zealand. A glossary of key terms is provided at the back of the Working Paper 2015/04: Methodology for the Government Department Strategies Index New Zealand.

The first three tables act as a table of contents for readers who may wish to look at the data by strategy, by department or by sector. Each row refers to one of the 136 strategies. Every table lists all 136 strategies.

Throughout the analysis our interest was not in the score per se but in how the strategy compares with (i) the other 136 strategies, (ii) the strategies within its department and (iii) the strategies within its sector. Hence, we have re-sorted this data to take into account these three different perspectives (see Tables 4 to 6).

The last column of each table shows the rank of each GDS out of 136 and also the order in which the profiles appear in Working Paper 2015/06: Profiles Scoring Government Department Strategies in Operation as at 30 June 2014.
